Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	3:29:34 to 3:39:14 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 3:29:34-3:39:34, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 3:29:34 to 3:39:14.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

3:29:34 (12574s)

What's going to happen? Yeah. Both of them seem very other than we know it's going to be a fight. Exactly. And also for those who don't know, she won the last trials, but the last trial sadly did not have a spot for ADCC. So, she's back here to try to get and punch her ticket to ADC 2024, the worlds, which is going to be crazy this year. Do you think it's going to be the wildest one so far?

3:29:54 (12594s)

So, even better than than last. 2022 would be one of the biggest ones. And he said that 2024 would be even bigger. And I'm not going to lie, I do not doubt that guy. He always comes up with something crazy. Mo delivers. Mo delivers. That is true.

3:30:14 (12614s)

He delivers. He's a true summary. I give him the mission and think it is already accomplished. Dude, Samurai, and we're thinking maybe 18,000 people at the T-Mobile Arena in Vegas this year. Maybe even more. So, even more. Can you imagine that? Now, I know a guy who's going to be there. Yeah, you too. I think I think so. Will be there. Ladies and gentlemen, seems like she's going heavy onto the Corsai and those under hooks.

3:30:34 (12634s)

Maria is going a little bit around. So, that that forehead to forehead thing. Ooh, throw down. Look at them. They're not waiting for points to count. They just want to get on top. They want to take each other down. Attack the legs. Let's see what's going to happen there.

3:30:54 (12654s)

Crossing the legs in there. Oh, she's almost got the hill exposure. Kawwani seems very tough on top. Now Kawwani's heel did get exposed for a quick second there. Yeah, she she did that her foot exposing there. Oh, seems like Maria is looking for a leg attack in there. It seems like she's very relaxed into her legs and just mostly focusing on attacks.

3:31:14 (12674s)

Yeah. Now, what's your opinion on crossing the legs? Like almost closing a figure four right there as you're defending. You deep leg entanglement and you cross. Oh, she got here exposure. Oh, almost got it. There was a good bite there. That was a pretty good body. Got a little worry in there. Who felt the defended? Well, that's what I love about some athletes.

3:31:34 (12694s)

They do not care about just like rasing off. They try to go for the submission at all times. are really looking forward like to put up a show and go like all the time pushing up the face on the matches and it seems like both of those girls are doing that. Deserve all the credit. They're putting on a show for us.

3:31:54 (12714s)

They're exchanging a little 50/50. Try to maybe expose the hill or maybe get out. Seems like she's able to remove the leg. Yeah, it looks like Awani wants to be out of the leg entanglement and I think she is somewhat. Now she's on top. Seems like Maria wants it back.

3:32:14 (12734s)

She's really trying to look for the scramble to get the lag and tangle in there. She's going a little bit on the There's an E bar there. She got a side kako almost getting the heel exposure. Yeah, I'm already getting the chills on my own legs. Uh she looked calm and collected once once she got her knee he she kawwani once she got her knee attacked she was

3:32:34 (12754s)

able to to defend by pulling uh Huato's leg up and spreading the legs apart she could not do she could not really bite uh her knee with her thighs. I think that Kawi is trying to look up for the back using the the the leg attacks of Maria to counter and go for the back attack.

3:32:54 (12774s)

And and I've seen like the entire day we had so many good fights and I've seen that happening all day long. She got a leg lock. Oh, she tapped. And she got the tap. She collects the tap. Maria is going to Vegas with a leg lock.

3:33:14 (12794s)

I really thought that she was skipping in there, but then she at some point just locked the knee in and gave a little bump and got the leg lock. It looked like Kawani was going for her back. I was going to ask you a question about that. We've seen many people attacking the legs. He does. And then Matina is also an MMA fighter. Black B from Gigo Jitsu.

3:33:34 (12814s)

For him, for Mateino, this is this is fun for him. You know, those MMA fighters, they've been through so much. They think, what's the worst that can happen? Yeah. I think that when you do MMA and then you do jiu-jitsu, you're like, dude, I can't I I can't be scared of something that because they don't it can't hit me. Nobody's going to Nobody's going to shin me to the face. Nobody's going to elbow me to the nose. You know, you're not going to punch me.

3:33:54 (12834s)

This is Vonario. Okay. So, he might smash me, you know. So, uh these guys and he he's significantly larger than Onaradio. Yeah. Seems bigger. He's a tall guy. Seems to be heavier, but Onady has some extraterrestrial pressure. Yes. If he's you do not want to have Onario on top of you trying to pressure pass and you cannot slip on him because his takedowns, his pressure passes, his pace into the match is totally different.

3:34:14 (12854s)

Good wrestler, good judo player. If you have him in in the ghee, he's going to take it down. Uh judo, good judo throws, foot sweeps. Um and and then uh no ghee, he's actually people don't know this, but he's actually a panam silver medalist.

3:34:34 (12874s)

Said you can't sleep on him. So he knows what he's doing as far as wrestling goes. Oh, almost to the kids in there and they just went across the entire mat right here and fell actually outside off the mat. Veronario uh taking Matelino down. Not scoring a takedown, but bringing him to the ground. Yeah, seems

3:34:54 (12894s)

like Mattails is a very like guy trying to slow a little bit the pace of the match and Onorio seemed like he was taken up into the pace, but then suddenly he just like switched and then went to the beast mode and tried to take him down outside bounds. On has shown some pretty good cardio so far. He hasn't gotten really tired and uh and this is what you don't want to

3:35:14 (12914s)

happen. If you want to a guy really heavy who's got his cardio on point and he takes you like deep into into eight n minutes overtime or whatever uh you're in deep waters. Those guys are trouble right there. Those guys are tanks. But uh as far as I know, Victor Enoro is a tank with a speed booster.

3:35:34 (12934s)

He's pretty good at foot sweeps and uh you yourself you you like those foot sweeps as well, right? I do a lot. You see, as I said, he switches up and then goes without stop. Oni was able to take it down and I think he's going to score. He got it. He's secure in the back. He might be able to score those two points. He's inside the guard. There's uh at least one shoulder on the ground.

3:35:54 (12954s)

Yeah, the thing is we're still not on points time, so I don't think he would be able to. No points time. That is true. No point. Going to be two more minutes. But being on top, being a heavier guy on the heavier division, I think it's a big trouble. This is where he wants to be, right?

3:36:14 (12974s)

Exactly. Cuz then he can start applying the pressure. And when he counts the points, that's going to be heavier. Uh that's going to be uh uh uh hard to deal with. Yeah. Yeah. That's going to be a challenge right there. Now, now Lo's playing half guard. This is This is what he could do. Yeah. But he got he got that's how he was able to defend himself. But got the arm in the head.

3:36:34 (12994s)

Under hook right there. How important is that under hook right there on on I'm not going to lie when he comes to Noi. If you have at least one under hook or both, that's a pretty good situation because then you can actually trap the guy and start pressuring him from top position. And you see that it's pretty hard for the guy on bottom to do

3:36:54 (13014s)

something because he doesn't have a lapel or something like in the ghee to pull you up. So, I just want to see what Matilos has got on the deck for Onorio in this situation there. That's five minutes. He's got five minutes and 30 seconds to count points and he's on a half court.

3:37:14 (13034s)

If he passed right now, there's no points awarded. But if he passed with four minutes, then there's going to be points awarded. I want to see what strategy he's going to come up with. Seems like the pressure is pretty big in there. Matilda's pushing on away. And that pressure squeezes your life out of you. Yeah.

3:37:34 (13054s)

Does it feel like he can't really do anything? Look at the shoulder pressure on the face. Seems like he's squeezing the face off my tails. He's squeezing the face off my toes. He's trying to squeeze your soul right there. Look at his trying to give the modders milk as people say. It might happen. It might happen.

3:37:54 (13074s)

Lights out. Dark room is coming. Yeah, Matt's opening up the half guard to release a little bit of the pressure on that situation. He got the side control. And there's 4 minutes and 30 seconds anymore. 430. Maybe Onario is waiting uh for when points. He just want to position himself for when points are awarded. He's going

3:38:14 (13094s)

to be he might he might try to pass straight to M. I'm not going to say that this is his strategy, but I'm pretty sure that Onori has a lot of time competing already. And maybe I think he's waiting for points time to go and pass again into the half court. I don't know if he's going to use the same strategy on pressing up the face and covering the mouth so then Matos can uh free the lag in there.

3:38:34 (13114s)

And now points awarded and he passed Aguire and is he going to get a point? Was right at the four-point mark. Let's see what they're going to do. So he's saying no. Ref says no. Now there's a mount. Now they're got him out. Now he's going to collect his points for the mount. Two points.

3:38:54 (13134s)

Is it two points for the mount? I'm sorry. So 3 minutes and 30. He got back to the half court. I think that it's going to be really tough for Matos to get off that situation because Onori is a heavy guy there with the pressure.

3:39:14 (13154s)

He's getting up the spaces in there. Well, he got the head and the arm once again trapped. And Mate Lino, even though even though he's surviving pretty well, he's trying to defend it. He's not giving up. But so far, he hasn't been able to put uh uh Onado in any type of danger. Is he able to pass? Oh, he tapped. No, I thought he tapped in there, but no, he just gave up the His face right there. Looks like he's about to tap, but we don't know. It's a
