Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	3:39:34 to 3:49:14 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 3:39:34-3:49:34, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 3:39:34 to 3:49:14.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

3:39:34 (13174s)

pretty tough pressure in there with that guy squeezing your head, but Mattel's securing very well. He pushes up the head and freeze his face now. Is able to breathe a little bit, but you see that he still has that grind on him. Still feels like he wants to go for the points.

3:39:54 (13194s)

2 minutes and 30 seconds left on the clock. Norio is still strong in the pressure there. He's going to look for the mount. Yes, he tries to. And Mateo is still on bottom. Now Onari got to the close guard.

3:40:14 (13214s)

Two minutes and 20 seconds. Onor's five points ahead of the the inside that open guard. Just became a half guard again. It seems like Onado has cracked the code for that for that half guard. Yeah, I'm not going to lie. I think that it's pretty hard for you to play with someone when they're not wearing a shirt. when you try to push them away and they keep pressuring you because it

3:40:34 (13234s)

just slides up into uh in top of you and it's pretty hard when a guy has that pressure in there. Mazine is keeping up that half guard pretty well, but it seems like Onario found the the space in the half court there.

3:40:54 (13254s)

One minute 30 for the match to end. Minute and a half left on the clock. Onario seems to be pretty safe right there. 5-0. He's got control of the head right there. I think he's just trying to control the game a little bit there.

3:41:14 (13274s)

Maintain Mattel's on bottom so he can secure the win. Trying to create a lever. Mattel's trying to create a lever there to alleviate some of the pressure. Squeezing the head in there. I think he's been trying to do that since the start of the match. That smoother tap and might go for the Kagati right there. Is

3:41:34 (13294s)

that an arm above his shoulder? He's bringing he's bringing the elbow. If he goes across the head, then maybe he has a chance. He knows he has less than less than a minute left. So, he might not want to do anything crazy cuz right now all the responsibility all it's on Mattel's Lina, right? Cuz he's the one behind.

3:41:54 (13314s)

There's 40 seconds. Matora, I think right now is just going to be holding up a little bit of the match trying to secure being smart. As I said, he has been a long time on the scenario. So he knows that some careless mov can do something bad. So 25 seconds for him to punch his ticket to ADC 2024 and he's showing enough action to not be penalized. Not getting a negative point.

3:42:14 (13334s)

He's not stalling. He's just pressuring all the time and pressuring. A lot of exchanges, but so much pressure. Got him on again. Now he might want to go for the back. We just got five seconds. Seconds.

3:42:34 (13354s)

Only 5 seconds and Onario is your champion. Ladies and gentlemen, Onario gets it done. Onario is your champion. Above 99 kilos, he is going to Vegas in October. Gets his ticket punched. What a match as I said to you. And now he's back here at another final match trying to punch his ticket again into ADCC 2024. Both athletes very good top players.

3:42:54 (13374s)

I think that this gonna be decided on who's going to be able to take each one down. This most likely will be a wrestling match and they're not a they're not afraid to exchange wrestling. Neither neither is.

3:43:14 (13394s)

Yeah. Secone is a very like Greco style guy. Very strong on top while I think Eli has a very good exchanging level situation there where he's able to go from top and bottom, top and bottom which makes most athletes pretty tired. So, I want to see how both of them are going to be playing. And he already got the single. This changing levels all the time. Does that confuse you? Does that make you tired? It's just annoying to deal with it. How does that make you feel?

3:43:34 (13414s)

I feel like if you don't know how to do it, it's going to make you tired. But if you know how to do it, then that's going to make your opponent tired. And as you can tell, it's hard to deal with that because you don't know when the guy's going to come inside and try to grab your leg or try to grab your head.

3:43:54 (13434s)

Sonia is strong on there on the guillotines. He tried the first time and then he's trying the second. Now I feel like Eli is going to be trying to go for the single or double legs. Maybe he's going to put a little more work and effort when it comes to points. One minute into the match.

3:44:14 (13454s)

The exchanging in there going bottom top bottom top. And at ADCC, one thing that you see is that some athletes that have not been so famous yet, have not won uh any major tournaments, but when they come here, they show some uh really good skills. And at ADCC, your name will not win the fights for you. Your reputation, your past, you need to come in and fight.

3:44:34 (13474s)

I feel like a lot of athletes fell down on the way because, you know, they think that they're just going to come here and do just like they do in any other competition. But ADC, it's savage. It's all the time like constant action, the roles, everything. It's totally

3:44:54 (13494s)

different. It's not your regular competition where you just come and drink like train for two weeks a month before. You need to be focusing on that. And Sakone gets a little bit onto the back in there. Yeah. The fact that you won the last one, the fact that you've been on the T for ADC, it doesn't really mean a whole lot. You got to come in and deliver everything. You really got to deliver.

3:45:14 (13514s)

We got to bring it because otherwise these guys when you fight ADC you know that fighters really really want this. No one is here. We got a suplex in there now. Second knew he was going he wasn't going to score any points with that. Do you think he did that to send a message to get into Eli's head? Maybe. I think that suplex has many minis. Uh when you play a suplex you spend a little energy. you don't count a lot of points, but I think that scares a little bit your opponent if he doesn't know how

3:45:34 (13534s)

to deal with the pressure and with the hype of the crowd sometimes cheering on saying like, "Yeah." So, I think that it can be good or bad. It just depends on you. How important is it to get into your opponent's head? I think that's one of the most important things because competition I would say that is most mentality and not so much about like how much you can do physically or technically.

3:45:54 (13554s)

your psychological state, your mental state, your emotional state. It's a huge part of the fights, not only physical and technical. Exactly. It defines a lot experience that it's like I think one of the most uh important things too because you know a lot of people here that come up and

3:46:14 (13574s)

they haven't had a lot of experience outside or they haven't had a lot of experience on competition. They get a little nervous and then they commit very small mistakes which causes them the loss. And you can tell there now that he's not pulling uh down. Now he's not trying to defend the back a lot because he can't go to the bottom position cuz Secon is not forcing him on a takedown.

3:46:34 (13594s)

Got it. And if he goes on bottom, he's going to get a minus one. So they want to be very technical. They want to be very careful right there. Yeah, Sakone can be harsh because that's a situation which can change the fate of the fight. 4 minutes and 26 seconds right now. We have 26 seconds to count

3:46:54 (13614s)

the points. And if Sakone is able to put him on his back from that situation, he's going to get points or getting hooks. Sinks a hook in. So, we know we know once the points start counting, he's going to go for the back, right? Or is that just a bait? Maybe. I think that he might try to go for the back because uh it's pretty hard for you to get two points from that situation in there. The guy's going to try to fight

3:47:14 (13634s)

as much as possible, but if you go for the back points, everybody, let's see if he's going to jump up and try to get get the back from there. And he did. And he does. And he does get the hooks in. Both hooks in. And he got the points awarded. Three seconds.

3:47:34 (13654s)

He did get the points. He got two points for that. He did get his two points. Three points. Sorry. So it was the back take, not a take down. Exactly. And as I said, Sein is a very fierce fighter. Start working the neck. won the last trial. So, I think right now he's going to be working to get Oh, I thought that he was still going to be on the back.

3:47:54 (13674s)

He was very deliberate in getting out of there. Do you think he's going to try to take the back once again and wreck up some more points? I'm not going to lie. I think that he doesn't want to allow uh to play bottom position because then it's going to allow him to be a little more I don't know uh aggressive, offensive. So, I think that he got out of the back so he didn't have the opportunity to get on the bottom situation.

3:48:14 (13694s)

And as you could see from his previous runs, he doesn't get scared on staying on top and playing Wely. He has no problem being there. Yeah. No, I feel like if he doesn't do much from there, if he keeps he keeps it up the way it is, he might get a warning pretty soon. It's hard.

3:48:34 (13714s)

He's got to be trying to take him down or take the back. It's hard to give a warning when he comes to a takedown situation because it's a quarry. It's going in there. So, I want to see what's going to be the action of the judges. I think it's calling it here already. Yeah, they've been communicating. The the table the table's been communicating with the ref. They're calling for action.

3:48:54 (13734s)

Ref nodded a couple of times. Sakone is attacking the back once again. Two minutes. I think he's going to jump for the back again. Oh, he goes for another suplex in there. It seems like Elias getting tired from that situation of carry Sony and keeping it. Sakone got the hooks once again.

3:49:14 (13754s)

He's been carrying Sakonei for he's been carrying Sakonei for like three minutes right now or close to three minutes. And it's hard to do that with a big guy like him. Two minutes onto the match. 6 for Sakonei. And I think he's going to look for the submission now. Has a 200 plus pounds backpack right there. And he get out again.
