Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	3:49:34 to 3:59:14 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 3:49:34-3:59:34, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 3:49:34 to 3:59:14.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

3:49:34 (13774s)

Give it everything he's got to get out of there. A little foot sweep. He's walking around the map, but I think he's going to put back in the middle. 1 minute and 51 seconds into the match. Elise pushing out a little more of the base to get out of the back situation and try to get the points back. But try to get six points on Seonia, is going to be hard.

3:49:54 (13794s)

Scoring six points at ADC is a monumental task on anyone, right? Especially at this level. Exactly. And Sakone just found a spot there. He's been he's been behind Eli for the entire fight.

3:50:14 (13814s)

Yeah, I'm not going to lie. I think that's a pretty cool strategy because Eli can't pull Gor right now otherwise he's going to get a penalty. And he does it actually still. Let's see if he gets the penalty. Now he's going to have to play guard. Yeah, he's going to be on now. It's a minute 20 seconds. Gone. Sony does not want to let him up.

3:50:34 (13834s)

Yeah, SK is going to try to keep up. the top position in there. You see that both athletes are already a little bit wor down from the match, but Sakone is keeping up the pressure on top. I think Adawi is going to try to engage into the leg attacks.

3:50:54 (13854s)

If Sakone engages and got the penalty from the point, going to risk anything definitely pushing the shoulders, keeping the distance. Now he stands up. As I said, Sakone is already a guy who did trials. He did ADC, so he knows about rule sets. Oh, Elise stands up once again.

3:51:14 (13874s)

He knows his rules. He got his strategy down. He's getting frustrated a little bit. I saw him like nodding there. Yeah, as I said, it's hard to deal with someone who is not wearing a rash card because it's very slippery and ADC starts getting sweaty. You can't get a lot of control. And Juju is all about control, right? If you cannot control your opponent, good luck submitting him, right? There is 40 seconds. Sakonei now is just holding up

3:51:34 (13894s)

a little bit onto the match being smart and controlling the points and Alliance getting frustrated with that situation. Less than 30 seconds left on the clock. Ma Sakone 6. Eli gets another hook right there. Sakone breaks.

3:51:54 (13914s)

You see right now that both of those athletes are pushing up the pace a little bit more with 20 seconds. Ooh, we got a little foot sweep. 10 seconds for the decision of who is going to 80C. 24 submits him. There's nothing he can do. 5 seconds. Snatches a single right there. And and we have your winner.

3:52:14 (13934s)

Sakonei just played a very careful strategic game. Score his points. Stayed safe. No risk of an injury or anything. Sony can b um was able to to submit his way to the finals as well. So, let's see what these gentlemen will bring for us.

3:52:34 (13954s)

And we're going to see now. They seem like they're going to be playing a lot of tie up immediately. And as you guys may know, Pinear is very well known for playing a lot on top in there. Very strong on the core ties, very strong on that piece with the Greco kind of like style. And it seems like Gabriel is corresponding with the same energy.

3:52:54 (13974s)

Yeah. And that's when we have great fights, right? When both fighters really want to fight and they respond to each other's energy, that's when you really have great great fights. Oh, he got the underhook. Almost a throw attempted there. Haroshi and Pedra is able to secure Gabriel on botan in the middle of the crowd, which is best. This is very unique about ADC.

3:53:14 (13994s)

Your favorite fighter might smash you as you're watching him fight. No matter. You both love it. Welcome to the ADCC. No matter what it is, keep fighting. Keep fighting. So, this not a fighting area, it's a suggested fighting area, right? Suggested.

3:53:34 (14014s)

Exactly. It kind of reminds me of Amy Campo against Gabby Garcia in 2022 where they were fighting actually at the entrance of ADC there. My goodness. They like it was one of the craziest matches for me, right? They were like fighting on the ground there and going for the submission. I'm like, dude, get back to the middle. unique to ADCC.

3:53:54 (14034s)

People love it. People talk about it. Uh the the highlights have great reactions from the fans and everybody wants it to happen. It's amazing when the fight Gabriel is able to get him tangled in there in the leg trying to come on top. It doesn't seem like he wants to play the bottom position against Pedro Marino.

3:54:14 (14054s)

So, he's got his hand weaving uh behind Pedro Marino's Pedro Marino's knee right there. He's defending it. But there is also we've seen it happening earlier today. There is uh there is a threat for a cast lock there for what happens there. Um so I think he's trying to go for the leg attacks but the thing is even if you try to come up on top for leg attacks or if you try to come up on top and a single leg or a double egg, it's pretty

3:54:34 (14074s)

dangerous to do that against Pedro Marino because his guillotines are super crazy good. Yeah. And we did get to see one earlier today with a little uh a little uh chin strap right there. And he was able to submit with one arm chin strap and got it done.

3:54:54 (14094s)

I think it was against Isaac, right? No, not against Isaac before before that. Oh, was it before? You know, we we get here early in the morning. You watch all the fights. We watch so many fights. We don't want to get the the opponent mixed up. But it's pretty easy cuz we're here for like 10 hours watching amazing fight uh uh after amazing fight. I'm not going to lie.

3:55:14 (14114s)

Every single match for me was so crazy that I just got hyped up from every single one of them. I was like at some point just standing at one side of the crowd there then go to the other side. It just keeps going better. And he's going for a leg entanglement. He's got the one leg trying to break it up. He's not afraid to exchange with Pedro Marine. Pedro Marine didn't want any of that. got out of that that little leg entanglement there when uh Gabriel Omea

3:55:34 (14134s)

had it his ankle um wrapped up and Peter Maria didn't want any of that. One thing very special about seat that's pretty cool is that you can push into the neck but not squeeze it. So it's pretty tough for you on bottom situation being like pushed away into your neck because you feel like you can actually breathe.

3:55:54 (14154s)

So it's tough for the guy playing on bottom. You can push the neck but you cannot you cannot actually grab the trachea, right? Yeah. just like Pedro is doing right now against Gabriel. And you can see that's pretty tough cuz all the time is pushing it away like hey get out of here dude and it's covering the mouth too which is something which you also can do. You also have the right to cover the mouth and and vagnaria does both of

3:56:14 (14174s)

them pretty well uh and and pretty often I would say the python choke from the back where he covers your breathing mouth and nose and he also pushes your just got to warn for the the mouth cover. I think his fingers were open so maybe he can poke the eye. You got to be careful of that. Got a warning uh for eye pokes. Even though he didn't poke Gabriel's eyes, his hands was his hand was open. And there's a danger of an eye poke. Mario's

3:56:34 (14194s)

uh Mario's wasted no time and gave him a warning. It seems like over fingers together. He's trying to find a way to get on top. Oh, he got an arm and he's going for the leg attack. He got the left. Sorry, the right leg trapped in there.

3:56:54 (14214s)

And the thing is that once you attack the leg, you do expose trying to expose the heel in there. expose your back a little bit. Yeah, but it seems like he's attacking with no fear. Pedro Marine seems to be out of danger there. And he free the knee. He's using the arm also to protect it there. His knee is free and he got the back. Stands up. Yeah, Pedro Marine is very good.

3:57:14 (14234s)

It's very good to escape escape those leg scrambles in there. But seems like Gabriel is relentlessly like trying to bring the leg in and trying to attack it. I think that might be his strategy because as I said, Peter Marie is a very tough guy on top. Very tough guy with the Guy teams. So if you try to come up

3:57:34 (14254s)

on top to get the points Carol is really keeping his neck safe. Gabriela so far, I mean Pedro Maria is really good at finding your neck. But so far Gabriel Omega has been able to keep his neck safe and bringing putting Pom Mar in some dangerous situations where he had to address uh the attacks. And you can tell that Per is getting worn out too because Gabriel is pushing up the pace that's not letting it out.

3:57:54 (14274s)

Gabriel pushing the pace. We love it. Both athletes really like looking forward fight and that's what the public likes again. And what's on the line is what's on the line here is nothing less, nothing more than a spot at the ADCC 2024 in Las Vegas in August.

3:58:14 (14294s)

A lot better than that, right? Nothing better than that. It's got to feel good to Oh, he got a little guillotine. As I said, it's pretty dangerous for you. He's dangerous. He will find your net. He's clear. He's clear. He got pretty tight in there. And he defends it out.

3:58:34 (14314s)

Gabriel Omea is able to get out of there, defend his neck as Peter Maring was just squeezing with all that he had. Man, that was tight. That was a tight guillotine. And as we said before, Mika, Pedro Maria will at some point Pedro Maria will find your neck. Yes. So you got to be careful at all times. You cannot let your guard rest for not even a second. And I thought that for a second Gabriel was going for

3:58:54 (14334s)

the back in there, but then Pedro suddenly just changed for that little cup and it was super hard for you to get out. Mhm. Gabri seems a little more scared now to go into the gu at this level and and with so much on

3:59:14 (14354s)

the line. So many things happen in in such a short time. One second things look one way and then the very next second things change. Yes. That's why we just saw any little mistake that you commit can change the fate of your match. Ooh, he's got he's getting Oh, I thought he was getting like triangle. Pedro skipped in there. Yeah, these guys can make history at any moment. Now we have only two minutes left on the clock.
