Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	3:59:34 to 4:09:14 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 3:59:34-4:09:34, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 3:59:34 to 4:09:14.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

3:59:34 (14374s)

Gabriel Mida, Pedro Marino. Gabriel Mida playing seated guard. Let's see if he's going to try. Oh, and just to count it out, it's still 0 0 there. He's trying a little de la Heiva action. Maybe he wants to go for the leg, controlling the ankle.

3:59:54 (14394s)

No points awarded. So I think this might go to overtime if there's no points awarded. No points. Zero zero. A minute third. Oh, he gets the leg entanglement. He's getting the leg. is going to try to find the heel once. Now he got the knee line. He got the knee line inside. Now he's trying to explode the heel. He's got Gabriel's foot. Oh, it was tight. It was a take down now.

4:00:14 (14414s)

I just could say all the time. Not quite. Now Mika, you seem a little jumpy, man. You're reacting here next to me. You're scaring me, son. I could say just like ooh ooh ooh all the time. No, this guy. He's been jumping here reacting. Gabriel got the foot, then Pedro got the foot, and then suddenly he goes for a double egg and then guillotine. It's actions from here.

4:00:34 (14434s)

A fighter, a commentator, and a true fan of the art. Sorry, I just get excited when I see a true match going on with action non-stop. And we see right now that both athletes still are pushing the pace even though there controlling Pedro Maria's wrist.

4:00:54 (14454s)

Seven minutes of match and those guys seem like they're still going. Yeah, they never really stopped. We got 45 seconds left on the clock. 45 of Pedro Fu trying to put the pressure onto the guard. Then Gabriel seems like he's still looking for that leg or that arm there.

4:01:14 (14474s)

Those guys are what true Giu are about. Now he switched. She was trying to go regular risk control, but for the last for the last minute or something, uh, Gabriel has been trying, he switched to to the double uh the two on one risk control. Why do you think he did that?

4:01:34 (14494s)

I think it depends. When you're playing in bottom position, it's like you got to you got to try to find your own way of controlling, keep the guy close to you, but at the same time try to protect yourself. So, I think maybe he felt something into the match. Not going to lie, you can only feel when you're in there. Seems like he changed up the strategy. Now he's coming up on top to play Wson with Pedro.

4:01:54 (14514s)

He wants to wrestle in the last in the last few seconds of the m the match. He wants to wrestle. It seems to me like they're going to overtime now. Do you think Gabriel is going to try to wrestle now? I think he can't pull guard and it's points going on the whole four minutes and it seems like both athletes are a little bit tired.

4:02:14 (14534s)

Now the only situation in which he can pull guard is that if he tries a single or a double he drives drives drives for more than three four seconds and then but that's the thing doing that with Pedro Marino it's pretty risky you don't want to do that right yeah expose a lot about your neck and I don't think that he is willing to risk that right now maybe the last look like it right I feel like he's going

4:02:34 (14554s)

again seems to be pretty deep right now and is getting around a little bit and he defends it once again. Ooh, 3 seconds in there and then he can pull ward. It seems like the opportunity for Gabriel has just appeared back defense in there. Very good from

4:02:54 (14574s)

Gabriel and then he pulls Guard in his bottom. No points awarded. Now I'm going to tell you uh uh Mika, if Gabriel Omega releases a tutorial, an instructional defending the guillotines, take my money. I will be buying that thing before he even releases it. No matter the price, I'm getting that. I'm getting that thing.

4:03:14 (14594s)

2 minutes and 50 seconds now. Gabriel pre bottom situation, bottom position in there. And there's no points on board. So I think like right now it's a good situation for him. He was able to get that on overtime. We're going to get more of what he saw in the second half of the the regular time. So let's see.

4:03:34 (14614s)

2 minutes and 30 seconds. Either side is going to be able to do more than what they did before. I felt like Pedro had some very sleek attacks there in the guillotine, but some of them came up from a reaction of Gabriel's attacks. So, I'm a little bit on the edge of saying that those attacks started by Gabriel and that may count as the referee vision.

4:03:54 (14634s)

Yeah. And just to remind you guys, there's uh we see we see the negative points, we see the positive points on the score, but the refs the table, the judges, they they will have there's more criteria to their decision. And uh it basically comes down to who wants the fight more, who was driving to get it done, who was looking for the submission, who uh did uh who pushed the

4:04:14 (14654s)

pace more uh will get the decision if it comes down to it. Yeah. And it seems like there's 1 minute and 50 seconds for the match to go down. We're going to see now who's going to be willing to go and do more attacks, get the points done or try to go for a submission. Both athletes seems like they're giving their all into the match.

4:04:34 (14674s)

And yeah, these guys are winners, man. No matter who wins, no matter who actually wins and goes to Vegas, these guys, they have nothing to be embarrassed about. These guys are winners and examples. Uh they put on such a fight for us. They've been trying the entire time trying to attack, trying to submit.

4:04:54 (14694s)

Yeah, and this is what we want to see. Sometimes you don't see an actual submission, but these guys, they have been trying. 1 minute 20 seconds left for your decision to who will go ADC 2024 and seems like Gabriel is trying to push up the pace and chasing the legs in there and trying to get a double or something.

4:05:14 (14714s)

I think Pedro has got a warning now from the table. And that's really all the fight all the fans that's really uh all that the fans could ask for. You know, the two guys well prepared both uh uh their condition is really good. Their technique obviously really good and and they're fighting with strategy and uh and strength, explosion, technique. This is all we could ask for, right?

4:05:34 (14734s)

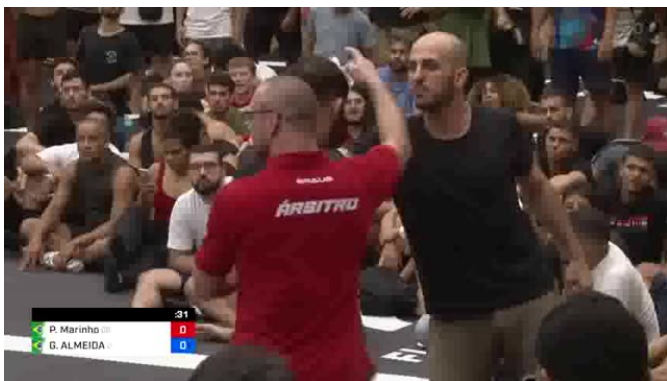

Yeah, I think Pedro right now is trying to push a little bit of the pace by playing a little on the hat of Gabriel. Oh, Gabriel decides to send up once again. The thing is with Fedra, it's very hard for you to go on those. 40 seconds left on the clock. This is tense. Tension is high here in S. Paulo, Brazil. Little foot sweep there for Pedro Marie.

4:05:54 (14754s)

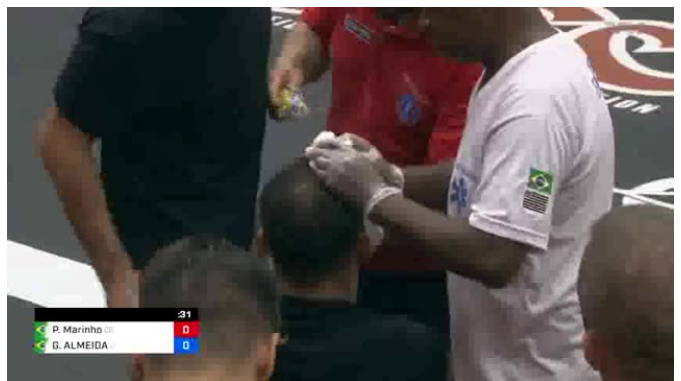

Oo, he gets a headbutt. Headbutt. Oh, dear Lord. 30 seconds on going. There's a little in there. He has two minutes to recover. Oh, it's bleeding actually from the head off. Has two minutes to recover. So, Pedro Maria's lip is bleeding.

4:06:14 (14774s)

Gabriel Omega's forehead is bleeding. Not going to lie, I think that sometimes that takes you off track a little bit cuz then you got to relax a little bit. You got your adrenaline goes down. We're going to see how both athletes are going to go back into the middle of the match. You got to have a strong mind, right? Cuz that can throw you off.

4:06:34 (14794s)

Definitely it can throw you off or that can be a help if you're a little tired and then you can rest a little bit. But time to breathe a little. Try time time to breathe a little. Try time time to hear from your coach maybe. Seems like Pedro is doing that well. Just resting there. He's on his knees breathing very well. Trying to control a little bit there. And he's listening to his uh from outside.

4:06:54 (14814s)

Now he closes his eyes for a second. He's focus focusing on his breathing. Probably thinking about all his goals in life at ADCC. 30 seconds left for the final of the match. There is a lot on stake. I'm pretty sure that he's given his all to just think and relax a little bit. And

4:07:14 (14834s)

Gabri is here on the side too. Try to recompose himself, stop the ble and come back to the match. We just hope that he wasn't something serious and then he come come back to the match. Otherwise, it would be a very sad ending for the match. We do not want to see that happen over here. Exactly.

4:07:34 (14854s)

It seems like the doctors will be able Yeah. And they're mummifying Gabriel Omega right there. I think I think Gabriel is going to be a mommy now, but that's okay. I know, right? He's willing to do any and everything as far as his uh uh being able to compete. I think he's going to be happy.

4:07:54 (14874s)

Yeah, that's all he wants. Those guys are willing to do everything to give their all to go to ADCC Worlds in Vegas in August 2024. We have 31 seconds right now. Oh, Pedro just laid down. Kill or get killed. Now, is that a good idea? Does that bring your breathing down, your heartbeat down? What do you think?

4:08:14 (14894s)

But the problem is if you go down too much and then the pace gets high again, that might be bad. I don't know. So, I think that it's up to each athlete. Isn't that Isn't that very personal as well? Like for some people for some people it might be good, for some people not as good. Maybe for some people bad idea, for some people good idea.

4:08:34 (14914s)

I think that it depends on athlete. I think it's pretty personal. It pretty personal, right? I think that's pretty personal. And then it's up to Gabriel Mus comes in. They slap hands. They're ready to go.

4:08:54 (14934s)

These last 30 seconds will be crazy. Let's see what they got. They're going to bring up the pace now. I'm pretty sure that both a going to decide what's going to happen. And he goes and shoots and doesn't care for the guillotine. And as you've been saying the entire time, shooting on Pedro Mouringo is always dangerous because he finds your net. I think that banish might be helping Vid to secure a little bit, but he escapes again. As I said, the finish off.

4:09:14 (14954s)

That's okay. 20 seconds. 10 seconds and he's not going to stop. They really don't care what's going to happen right now. They just want to win the title. Two and one second. And this is it. Let's see who's going to Vegas. Who do you think is going to get the nod? I really can't say who won this
