Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	4:29:34 to 4:39:14 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 4:29:34-4:39:34, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 4:29:34 to 4:39:14.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

4:29:34 (16174s)

Yes. And I think that it plays a lot in that match cuz the competition itself, I I don't think it matters that much, but I think that because they trained with it uh each one so much, they know what they're expecting. They know what's about to come. So maybe references, they know tendencies, they can anticipate moves.

4:29:54 (16194s)

Exactly. So I think that they're going a little more slow paced because they know that if they do something careless, something bad could happen for both sides. Yeah. I think and jiu-jitsu is funny because jiu-jitsu like you they probably uh if I do this, he'll do that. If I do

4:30:14 (16214s)

this, he'll do that. And it is a pretty uh uh pretty humorous uh I think it's Helen Gracie quote where he goes jiu-jitsu you do this he do that you do this he do that forever and that's pretty much what it is. Yeah, I think I think I'm not going to lie, when someone says jiu-jitsu is a human chess, I don't think that they truly know what that means. But the reason why it's called a human chess is because masters truly like true masters

4:30:34 (16234s)

of chess, they have so many movements ahead of time before you even take your first step. And that's what true master of jiu-jitsu do that to because you literally you're like, "Okay, he's going to place his footy here. I'm going to do that and that and that." And so you're thinking like three moves ahead. do something now, but you're not

4:30:54 (16254s)

really thinking about this. You're already anticipating what's going to happen like exactly moves down the road. So, I think that's the reason why it's called human chess. But most people, they just say, "Oh, it's human chess." But they don't know the reason why it's called human chess. And definitely a little bit of poker as well, right? Human poker. Cuz sometimes things are pretty bad and you keep that straight face.

4:31:14 (16274s)

Yeah. And as if it nothing's happening. Oh, he's going for the back in there, but I think it's a little slippery and hard to get it. Yeah, might be able to get out of there. I think Frisio went for the back. Still got one hook, but he still didn't get the second one. So he escapes and his on top and Kawan's on bottom once again. Fabris tried to attack a little Kimur in there. Went for the back attack, but Kawwan was able to escape. So right now we have three minutes on the clock.

4:31:34 (16294s)

Points are being awarded from any point forward and both of those guys are not give any inch. Now I remember last week to to profess and he pointed at Kawan this exactly a year ago he pointed at Kawan and he said

4:31:54 (16314s)

at the open here same gym and he said that kid is going to be under 66 next year and here he is he got two finals already got finals in Bel and now he got finals here in S. Paulo not doing terribly bad right now. Yeah, 30 seconds left on the clock.

4:32:14 (16334s)

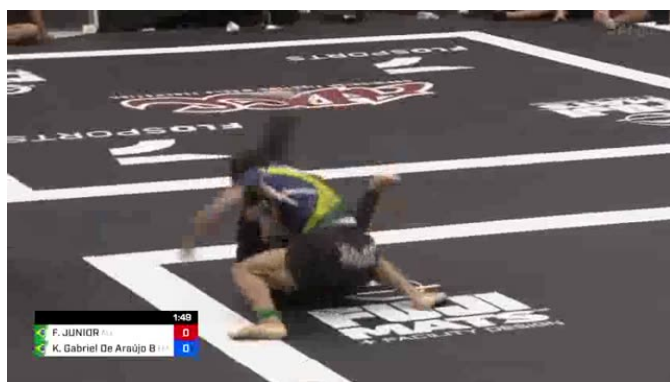

Doing pretty good. Was able to take down and he's going for a leg entanglement in there. Andre Andre is trying to defend the leg. M's going to try to stand on top and he's trying to get on top and he gets on bottom again on the one leg ax.

4:32:34 (16354s)

Fabris is able to get the leg and tangle out. Almost the to get out of there. with these two last attacks for could not launch an attack of his own because he had to deal with the trouble that Kawan was bringing. Had to work in a defense actually, right? He had to address it. He had to address the attacks and that tells you something about the how efficient the attack is being. Yep.

4:32:54 (16374s)

Sometimes your attack, they don't feel like you have to address it. You can launch an attack of your own and everything is fine. But when you address it, it's because it's at least bothering. Yeah. People say that the best the best offense is the best offensive offense. He's going to come on top. He came on top. Oh, that's going to be an action. So strong, so powerful.

4:33:14 (16394s)

Very good with the base. He was able to kick one a few feet away. One minute 30. Seems like he's trying to get for the pass. Trying to get close to the hips in there. got both knees locked in

4:33:34 (16414s)

and Kawwan is able to frame in and face back against Fisio to play his guard. Tension is high. What a fight. One. Okay, just a quick fact. 1 minute and 12 and those guys are playing Metallica. They really want the thing to go up. Sandman, right? Entering Sandman. And this is really pushing up. You weren't even born, son.

4:33:54 (16434s)

Yeah, but I love it. I know culture. Oh yeah. Oh yeah. A rock and roll fan. One minute to go down. Enter the Sandman on a 80C trials final. I feel like they really want this match to go up to history.

4:34:14 (16454s)

Yes, I do. But I'm not going to sing them here because my voice not that good. Yes. Fighter and try. half 30 seconds. 30 seconds left. Wolf a going to look now for points.

4:34:34 (16474s)

He's still playing very good game on bottom situation in there. And you could see that at least on the start of the match, he was able to take Fissa down and I'm not going to lie, the capa the capacities of Kawwan. Oh, he's able to get the leg. It's going to come on top almost in there. He got an action. But the capacity of Kawwan on the rainy as far as Wesley I've seen he evolved a lot from last time. So I want to see how

4:34:54 (16494s)

it's going to be playing on those four last minutes on the overtime which I think it's going to come now. It will start now immediately. It's going to come now. Four minutes immediately start the right

4:35:14 (16514s)

overtime right now. Starting four minutes points going on. Negatives too. He can't pull guard. Now it's going to be a little wrestling showdown. Kawwan very heavy on the color ties. Kawwan does not care about the pass.

4:35:34 (16534s)

Does not care for an ABC trials winner. He is in there trying to win, trying to do his thing, trying to get his ticket punch to Vegas later this year. Just so you know, some people know, Fabris is very good with the ankle picks and he feels like I feel like he's trying to get a little bit of the range to do that ankle pick that he does and Kawaii is not allowing him to. Ooh, he's not letting the the single leg go in. I

4:35:54 (16554s)

think he felt it on the first time, right? Um 3 minutes and 15. Both guys pushing up the pace on the wrestling there. Fabricio doing the hand fighting while Kawan is like trying to free it a little bit and he goes for that ankle break that I

4:36:14 (16574s)

said is able to defend it. That was an action for you could see that coming a mile away, couldn't you? Definitely Fisú just pointed out to Kawan to go to the other side. Seems like he wants to push up the pace and try to play a little mind game.

4:36:34 (16594s)

So right now we have 2 minutes and 40 seconds. 0. He got that ankle pick again. Oh, he got that too. Kawan is going to attack. He's not letting free.

4:36:54 (16614s)

He's pushing up the face trying to get out of control. Goes a little bit. Oh, he's almost getting to the single leg. Kawwan's not afraid to go for the taked down. Soon does know as Fabricio going heavy on the car tie in there. 215. He gets the single leg. He gets out. Fabris is not trying to engage into that takedown defense in there. He's already trying to look to be away from Kawwan. It's not be close.

4:37:14 (16634s)

Two minutes to go. Yaka once being able to defend that ankle pick very well.

4:37:34 (16654s)

Neither of them show any desire to to fake down and feels like Kawwan is trying to get that single leg in there. 40 seconds left a little bit lower.

4:37:54 (16674s)

1 minute and 30 and Kawwan is trying to get that single leg. Khan wants a little bit of the attention in there and almost got a take down. He was looking at something. 1 minute 20 for the decision of who is going to take their ticket to ADCC 1 minute and 15 seconds.

4:38:14 (16694s)

We're going to get your champion for ADCC 2024. And Kawwan is now letting free to the back. round face. He's going to defend the back and Forbes is going strong. Oh, he defends the back and goes to attack your Ward.

4:38:34 (16714s)

Look at that. What are going back there? He's almost 55 seconds to the match final and it's not going now. They stand to exchanging take down attempts. Oh,

4:38:54 (16734s)

the one's showing signs of fatigue. He's trying to see the clock. There's 47 seconds left. Now, it's really a battle. Not a wrestling battle, not a jiu-jitsu battle. This is a battle of who wants it more. Oh, Fisa got an action once again to the back. Wants to go for the legs. He's going to defend the back.

4:39:14 (16754s)

Got one hook inside. No, just one hook in the second one yet. Trying to get a free arm in there. He's able. He's trying to free it. He got the triangle in. 20 seconds
