Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	15, one every 20s
Covers	5:49:34 to 5:54:14 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 5:49:34-5:54:44, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 5:49:34 to 5:54:14.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

5:49:34 (20974s)

All white for Rocha. All black for Enriquez. Roachcha like a sniper from bottom. She could be on a triangle, an arm lock, guillotine so quick. Enriquez is incredibly well-rounded.

5:49:54 (20994s)

And we're seeing sort of a similar story in a lot of these finals. Jay, a competitor with an incredible wrestling like a traditional wrestling pedigree versus a jiu-jitsu athlete with good wrestling fundamentals. Yes, Florida. You're East Coast silver medalist representing Varo Martial Arts.

5:50:14 (21014s)

Professor Jasmine Roachcha. [Applause] And here we go. The last female match of the day, the under 55 kilogram division. Heavy on the head early for Enriquez. Yeah. Looking to pull to a front head.

5:50:34 (21034s)

Twoon one. See if she tries to roll through on this. Oh, snaps to try to get to the back here. Elevation by Jasmine Roachcha to mitigate some of that tight pressure by Alexriquez. And now she's on her back.

5:50:54 (21054s)

And again, she's able to get to the mat safely there off the takedown and and immediately getting that guard high. Right. We talked a little bit during the bracket portion of these divisions how a lot of the competitors who competed in the ADCC Open have seen incredible

5:51:14 (21074s)

results in the trials that they've competed at. And Jasmine Roachcha is no stranger to the ADCC rule set competing at the ADCC Denver Open, winning double silver and getting double gold at both the Orlando and the Dallas Open. So very active in that regard. her and her brother come out coach all day, coach the kids all day, adults all day and they jump in and kill it in their divisions.

5:51:34 (21094s)

I had a chance to speak with Jasmine after her performance at the Denver Open and she had said that one of the biggest differences in her career is her working with a sports psychologist and she said that has had an incredible impact on her mentality and we've seen it. She's making it to the finals of the West Coast Trials and there is something about the confidence that she brings to these tournaments. Once again, big elevation and remaining in the guard.

5:51:54 (21114s)

Yeah, I'll tell you that is where and you see her trying to pull Enriquez closer. And I'll tell you this is where Jasmine can do some damage is when she has you tight like this and she has access to your upper body where she can snatch an arm, snatch the triangles. Again, you see the arm already coming over top.

5:52:14 (21134s)

Kang off to her right side. Enriquez brings that knee over to split. twoon one to that far side.

5:52:34 (21154s)

Enriquez steps over both looking to butterfly herself, but Jasmine elevates again. Second time she's had success with not going over top with it, but seeing that she can elevate her enough. But what that's going to do is that's going to cause Alex and Raas to approach the guard pass in a different way. You don't want to get elevated over and over and over again because that can lead

5:52:54 (21174s)

into a leg entanglement of some sort like you see Jasmine Roachcha threatening right here on that right side and you would get elevated by playing this close to Jasmine, right? That's I'm I thought maybe Enriquez might play again a looser game like we've talked about in a few of the earlier matches to kind of drag Jasmine towards her, you know, rather than move into Jasmine if that makes sense. Yes.

5:53:14 (21194s)

Vagner Roachcha in the corner of Jasmine Roachcha. Very animated coach. Yeah. You want to know what one of the smartest corners for this rule set that I've had the pleasure of listening to as a judge? You know, as far as somebody that that understands what needs to happen, not only to win, but to score and not be

5:53:34 (21214s)

scored on. That's, you know, such an advantage to have in your corner in your corner. And then to be your father. Yeah. perhaps having the match of the tournament at 2022 ACC World because Isaac Michelle and it was that sort of strategy and that knowledge of the rules that got him to win that match now coaching his daughter. Arm drag attempt.

5:53:54 (21234s)

Jasine Roger came into this final with a victory over Tammy Musa Messi. Staying tight again. Alex Enriquez victorious over Amanda Bru in her semi-final. Oh man, they had the from quarter or I'm sorry from uh round of 16 on these ladies had nothing but monsters had to get through.

5:54:14 (21254s)

Another guillotine attempt. Very powerful pass attempt over and over with this guillotine by Alex Enriquez. We're about 20 seconds to points here. Little eye poke.
