Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	6:00:05 to 6:09:45 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 6:00:05-6:10:05, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 6:00:05 to 6:09:45.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

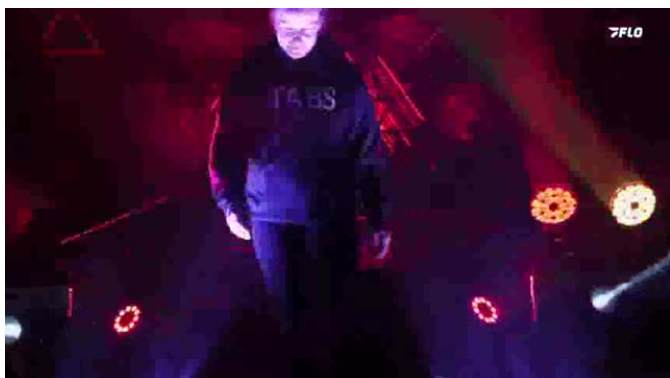

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

6:00:05 (21605s)

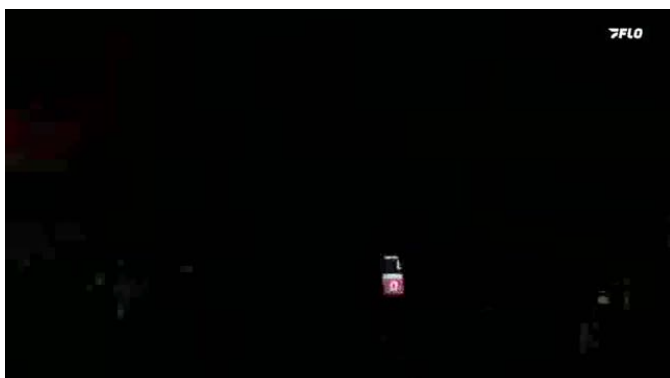

the young and talented Helena Crabar who's taken the jiu-jitsu world by storm. See if she can replicate that success here in the finals. Mo Black. No easy no easy run to get to here going through Leila Watkins, Stephanie Klein, and Caitlyn Huggins

6:00:25 (21625s)

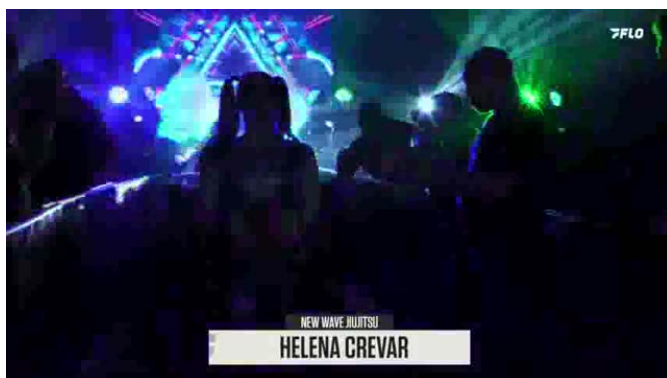

had a world champ right out the gate in this bracket for Mo Elena coming through. Vickers, right, and Luna and then Nicole Matthew to get herself here in the rematch. And if you remember, it was a it was a very very

6:00:45 (21645s)

close match at East Coast and you had that tactical error where Helena had stood and then sat after the 3 seconds and got herself the negative and then sat again in overtime uh which is what ended up putting her down by the negative point.

6:01:05 (21665s)

Captain America coming to the ring right now. Helena Crabar of New Wave Jiu-Jitsu looking to get some revenge here on the main stage in the center of all eight mats. And live on flow grappling at the 80cc West Coast Trials. Immediately goes to shake referee Miguel Benitz's hand.

6:01:25 (21685s)

All black for Mo Black. Helena and the stars and stripes out of the red corner from Colorado Springs, Colorado. The East Coast Trials Champion representing Caps BJJ. Let's hear it for Mo Black.

6:01:45 (21705s)

And out of the blue corner from Austin, Texas by way of Las Vegas, Nevada, the East Coast trial silver medalist representing New Wave Jiu-Jitsu, Helena Kar. Yeah.

6:02:05 (21725s)

Running it back here in Vegas. [Applause] All right. Again, Gravar can't pull, so she'll have to wrestle here. Obviously known for her guard work, but she's a tremendous leg locker. Dangerous upper body submissions from the bottom.

6:02:25 (21745s)

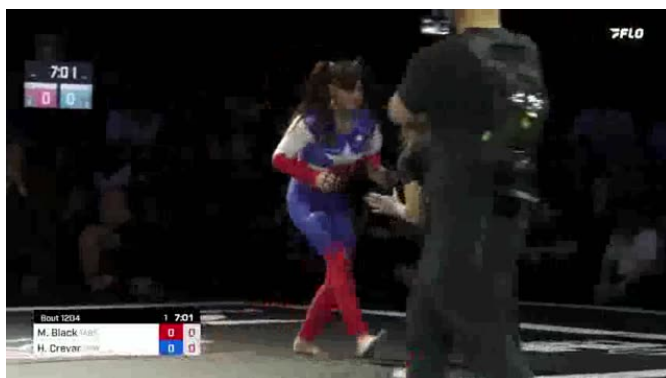

Dangerous lower body submissions from the bottom. Bottom. Something we see a lot about out of the new wave competitors is a heavily heavy emphasis on the collar tie. Yeah, very smart, intelligent hand fighting.

6:02:45 (21765s)

Black tweek one and immediately switching to the other side. Carvar with a over hook trying to step in for a little off balance.

6:03:05 (21785s)

She'll keep on the collar. Black will stay on the two-on-one. Oh, nice nice attempt there from Mo Black. Mercy grips here from Mo Black. Elena will get a high

6:03:25 (21805s)

collar tie. See her keep slipping from that collar tie. Oh, look at this guillotine now. Just and dragging her down. What a smart move. Again, let's understand too that if you even jump for a submission, that's still considered a guard pull. But if Helena were to get this front head, drag her down to where they're both on their knees, you can neutral that position out and then take bottom safely.

6:03:45 (21825s)

Could be the plan. I don't know. I would imagine she would want to go to where the match suits her best, which statistically would be her guard. Yeah. Mo Black in their last match up did have a lot of success actually waiting through the different guard attacks of Helena Cravar, even giving a

6:04:05 (21845s)

good a couple good pass attempts of her own in that match. I think something I'm noticing too with Mo Black is her her keeping winning inside position when she's trying to grip when she doesn't have that two-on-one. Notice how she's trying to keep her thumbs inside almost in the elbows and things like that so she's not ending up on the outside of an overtie.

6:04:25 (21865s)

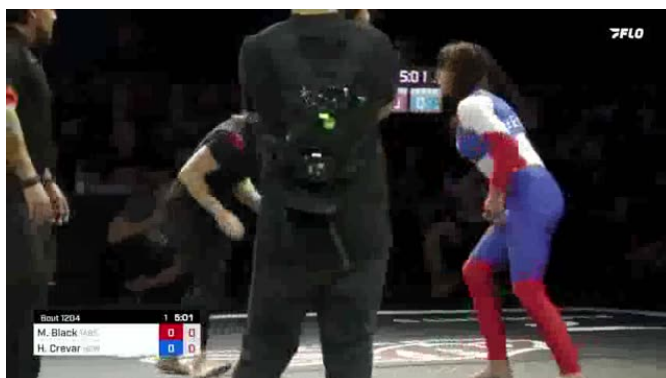

Looking for a quick tuck under heavy on this tnoon one. She'll regrip that over tie here from Crear. Looks like Helena is positioning her hips to look for that Uchima.

6:04:45 (21885s)

Yeah, right. Every time she's when she has that over hook, it looks like she's trying to step in front. Mo now. Tnoon one here for Crevar. Switches it to a collar. And there's that over hook again.

6:05:05 (21905s)

And and you see black matching the circle. You know what I mean? Like as Helena circles towards her, black is circling the same direction. So she's not closing that distance and able to step in front. Now tnoon one from Oplack.

6:05:25 (21925s)

Tnoon one again into that Russian. Hanging heavy on that arm. Yeah, able to free it. Got an under hook now. moving around.

6:05:45 (21945s)

30 seconds. Man, I Man, it has me wondering if Look at this. Like we talked about that Uchima attempt. And Black circling away from it. Very important to keep the hips square in defense of that kind of attack. Able to get that leg inside here.

6:06:05 (21965s)

And this is what Helena wants in on a leg. Correct. And not only on the leg, but with 5 seconds to go till points, she's got herself to the bottom position safely where she doesn't have to worry about being scored on. Great strategy out of Helena Crabar to adopt the bottom position there. But took, you know, 3 minutes and 50 seconds to work

6:06:25 (21985s)

Mo, you know what I mean? to work black to to circle with her to make her hand fight to give her some to give her a little bit of uh you know look back and not just be at bottom position in the corner of Helena Cravar as you

6:06:45 (22005s)

can see legendary John Danner score on that as Helena Cravar gets top position here. That's going to give her two points. Yeah. Sweep points for Curvar.

6:07:05 (22025s)

Still controlling that front head. And I think one thing you'll never see Helena do turns that angle on that foot. We'll see her probably her other foot kick that top knee to free her heel. Um she trying to lace through on a Dar. Can't see if that left arm is under.

6:07:25 (22045s)

Definitely heavy crosscage with that right arm. Yeah, that left arm sneaking through. Is that what it's doing? Nah. You know what? Mo did a very good job of blocking that hand from getting past her shoulders towards her neck. Almost with that foot free as Helena Crabar goes to kick that top knee to free the heel. turning that hip out.

6:07:45 (22065s)

You could see she doesn't want to commit to really falling towards the hip because listen, Black's still in a position where she can dog fight up to her knees and come across, right? So Elena is really pushing and she gets it free.

6:08:05 (22085s)

Black turns to Turtle just like we talked about. First hook is in. Staying off on her side here. Let's see. Yeah, Black obviously going to try to capture above the knee and Helena as she maintains this control. How tight she is burning time off of the clock with this two-point lead.

6:08:25 (22105s)

It's going to take a big explo. It's really going to take a risk by Mo Black to get out of this position at this point. And doing a very good job of covering Black, right? I mean, when she was in this leg ride position, she's covering the knees, she's covering the hips, she's covering the upper body. like very difficult for black to build height to be able to do anything.

6:08:45 (22125s)

Such a smart competitor at 17. You know what I mean? And there you see her step back again and move back to the leg ride. Rather than stay left leg past the hip, she pulls that leg back and moves to more of a leg ride. This might allow her to be able to get to guillotines from here. Cravar is going to get her first warning on top. And again, it's festivity. She's in the lead, so she's going to be the one that they're pushing to do more action, right?

6:09:05 (22145s)

They're never going to let you try to coast here. The ADC judges, wait about 8 seconds. Yeah, 8 seconds of inactivity and you better start moving. No, it's good. It's it pushes the sport to new levels of excitement.

6:09:25 (22165s)

And Cravar again, she stepped the leg back to move to a leg ride rather than stay with that left leg piss. Second warning now. And look at this. Oh, Black trying to go under for the deep half and power up on a That's why she had to stay tight. That's why she had to stay tight. Now you got Black on the wrestle up and smart move by Black. Now Black's going to be up on the feet.

6:09:45 (22185s)

Elena trying to pull her back down again. If she can get her to her knees that she can neutral out this position. Black knows that, too. She knows that she can't. She knows she's got to figure out a way to circle herself out of this this lock so that she can go after 10 seconds. Helena Crabar just continually trying to snap her down to the ground.
