Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	6:10:05 to 6:19:45 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 6:10:05-6:20:05, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 6:10:05 to 6:19:45.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

6:10:05 (22205s)

Puts her down. Oh, look at this. She my four-pointer here. And that is going to do it. Helena Crabar is going to the T-Mobile Arena for ADCC Worlds. Wow. triles champion ever, Helena.

6:10:25 (22225s)

The youngest ADCC trials champion of all time, Helena Crabar of New Wave Jiu-Jitsu. What a great story. Helena is such a great kid, too. Like, just polite kid. Every time you see her, she's just a joy to be around. To see her do what we all knew she could do, right?

6:10:45 (22245s)

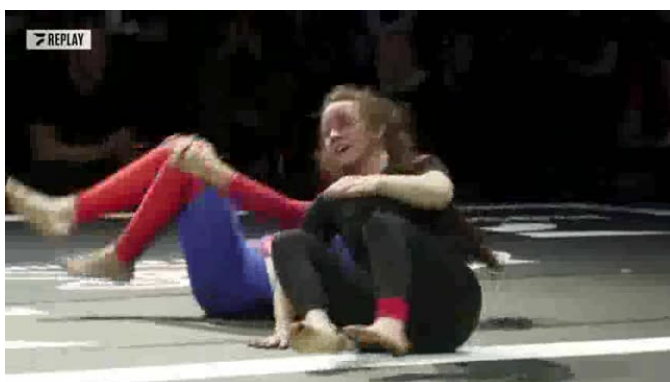

Come in, win a trials, and get herself into the big show. What a huge accomplishment. Mo Jazzam's having a conversation on the side with Mo Black right now. Getting up from his spot at the judges table. Got to wonder what kind of conversation's going on there, but we're going to look at this replay. Jay, talk us through it.

6:11:05 (22265s)

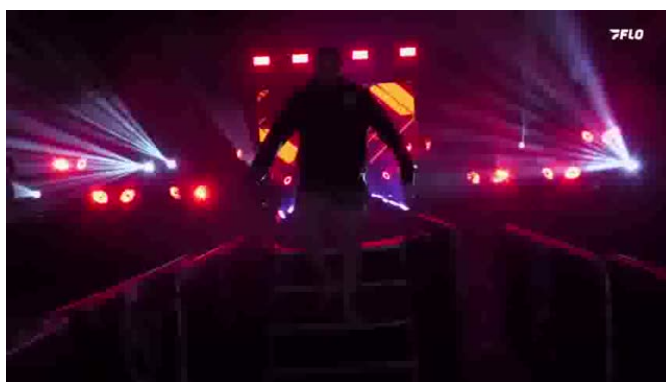

All right, again, Cravar with that over hook. Here's what got her safely to the ground. Went for that went for that uchima and got herself safely to the ground. This is where Mo Black went for that submission. Uh it was as Helena was coming up and Helena able to score the

6:11:25 (22285s)

two here and then this is the running out the clock and puts her down with a guillotine with five seconds left. Almost four points are here. Beautiful work from the 17-year-old New Wave Prodigy. Ladies and gentlemen, coming up on Flow Grappling, who's number 123?

6:11:45 (22305s)

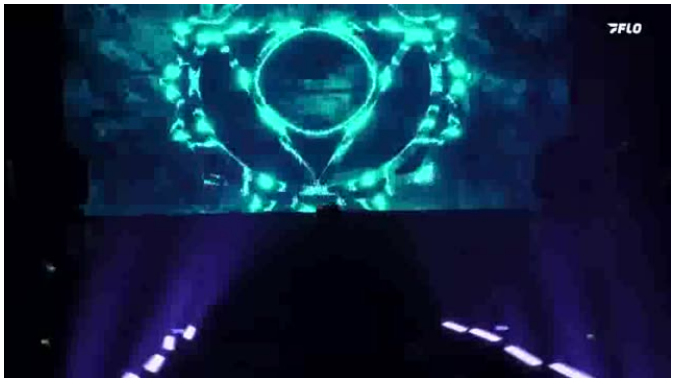

Two time ADCC trials champion. Winner of a West Coast, winner of East Coast in Jersey just a few months ago, ADCC veteran, veteran of the PFL as well. Walking out to Don't Stop Me Now by Queen. She always has the best walk out music.

6:12:05 (22325s)

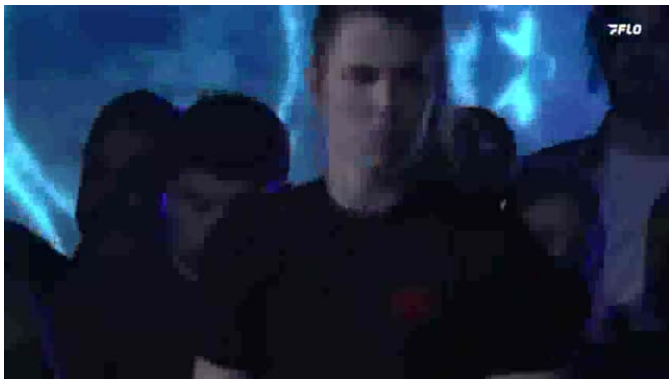

I have the very lucky to have a close relationship with Amanda. Got to corner her in the other two trials finals. stepped away to hit the commentary booth this time being cornered by her brother. Much to the comedic displeasure of your cohorts. Oh, much to the comedic expense of my cohorts. Yeah. Mro Mrovic making her way out here.

6:12:25 (22345s)

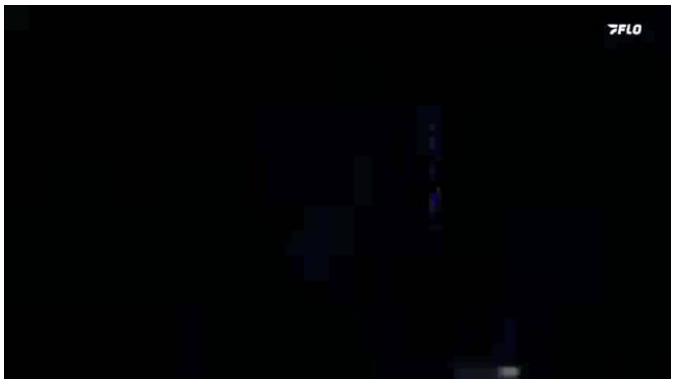

Mrovic had a very good run taking out East Coast trials silver medalist Bridget Mcle to earn her spot here. displayed a very flexible and dynamic guard in that match you just mentioned.

6:12:45 (22365s)

Look at the intensity on the face of Elizabeth Matrovic. You can tell this final performance means a lot to her. She's got her hands full with Amanda Levby. This is going to be a great final match. Big moment here for Mitravik.

6:13:05 (22385s)

Amanda Levya the gray and black all black for Mitravic the red corner from Philadelphia. She is an East Coast and West Coast ADC Charles trials champion and an ACC veteran representing precision jiu-jitsu. Amanda Levy, let's go.

6:13:25 (22405s)

Amanda Levy in the gray and black, California, representing alliance, the 2023 Noki World Champion, Professor Elizabeth Mitravich [Applause]

6:13:45 (22425s)

in the black. All right, here we go. Eight minutes on the clock final. I love seeing the classic t-shirt and fight. She used to be spats and long sleeve rash guards. And once she went shorts and t-shirts, she never went back. It's a comfort thing. Very good wrestler is Levy. You see by the faints, the hand fighting.

6:14:05 (22445s)

Again, Matrovic, very good guard player, but will have to either accept the taked down, take the penalty, or get on a shot of her own. And Matrovic also keeping her hips very far back in anticipation of the shot.

6:14:25 (22465s)

Yeah, sometimes that leads into snap downs and into situations like this. Tweek one here from Levy. They'll move back to center. Levy all finishes. Believe all stranglers from the back. A hard faint there from Levy. These are the reads that a lot of experienced wrestlers are able to make when you just you pump the fake in a lot of different ways to see what your opponent's going to bite on and then you commit once you have the read.

6:14:45 (22485s)

Yeah. You know, Amanda wrestles with wrestlers. She does her jiu-jitsu with jiu-jitsu people like she's she's good at wrestling because she focused on wrestling with wrestlers.

6:15:05 (22505s)

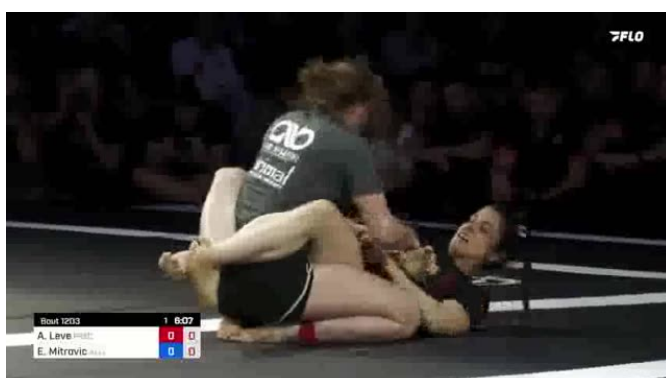

We saw Brandon Reed Exactly. do the same thing. It's a whole different dynamic. There it is. Look at that. Big take down from Amanda Levy and immediately trying to pass the guard. Yeah, immediately looking to go north south here. She's got to get her shoulders lower than the knees of Mitrovic. And we we were just talking about that, Jay. Right before that takedown happened, she was fainting, fainting, looking for the opportunity. And the moment she had the read, she committed and got that big taked down.

6:15:25 (22525s)

Here's a stack over top. Hard stack. Knee over top. Gets those arms inside. Saw Mize trying that strategy on Matrovic in that semi-final. Mrovic will that Mrovic is probably so much more comfortable now, right? Closed guard. This is more where she would again when you look at ways to win her ways to win are going to be from here.

6:15:45 (22545s)

Closed guard trying to get up over top.

6:16:05 (22565s)

Third finals appearance in a trials for Levy trying to collar time pass that arm across is Mrovic inside position on the hips for Levy.

6:16:25 (22585s)

timed that took down to put herself in a good position. Started passing immediately, but Matrović did a good job getting herself back to guard. And Levy trying to get out of this guard position, but Mr. doing a good job staying busy.

6:16:45 (22605s)

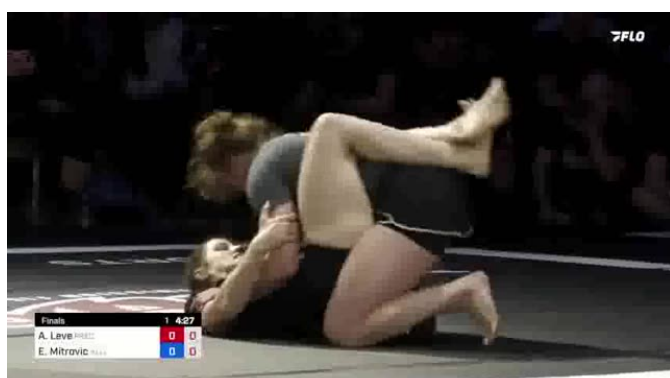

Yeah, constantly causing Levy to have to think about the safe way to approach getting out of this closed guard. And the Safeway is going to be able to get inside position, stand up and break the legs. Figure four off on the body. It's going to start to bring Levy up through her feet.

6:17:05 (22625s)

Often times getting out of the closed guard, you kind of have to put yourself in a little bit of a precarious spot and be ready to defend Kguard entries and different leg entanglements that people go for off the break. Trying to tie up the arms here. We got to start working on the bottom.

6:17:25 (22645s)

Action bottom calling for action out of Elizabeth Matrović. Yeah. And that's going to be because the guard hasn't opened, right? Guard has stayed closed the whole time. She has to be trying to also work for a sweep as Amanda has to be trying to pass. Now Jay, let's say that the competitor on bottom has our guard closed. They're going for kimoras and guillotines are staying active. There's a different story. Yeah.

6:17:45 (22665s)

Oh, look at this little kimora sweep attempt. Very traditional. That'll get Levy up to her feet. She's got a good angle here. She gonna try to open up the guard. The good old elbow in the thighs technique.

6:18:05 (22685s)

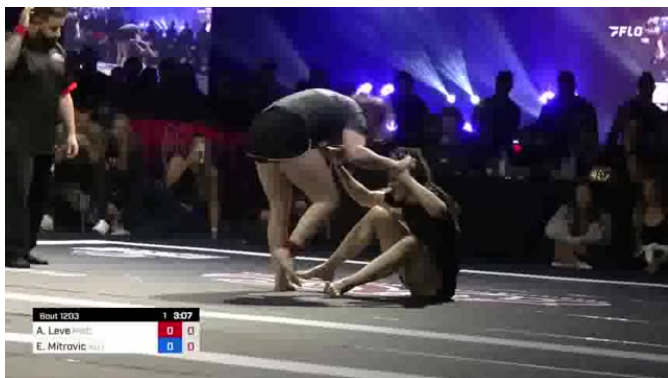

Trying to open up this guard of Mitrovic. And it will open. She tries to push Levy back. Look at this. And that'll get Levy where she wanted. So she had a strong push forward, but now it got Levy where she wanted, which was back to the feet and out of that guard. Shinto to shin here. Trying to step back over trying to get underneath the leg. Little elevation.

6:18:25 (22705s)

Oh, look at that. That might have allowed Levy to get a double under here. Yeah. And she's got a hard stack. From our angle, it was over the top. Yeah. Both arms are out.

6:18:45 (22725s)

Allowed her to get Yeah. From our angle, it looked like perhaps she had a shot at the triangle, but good on you, Jay, noticing that double under again. Lifting the legs here. Moves almost to a butterfly. Yep. Very smart move by Levy. Getting back to the feet rather than staying there to let her lock up a guard again. Trying to move to the side.

6:19:05 (22745s)

Swinging that leg around defend the guard. Chova gets her guard closed off again. 2 minutes 40 seconds in regulation. Metravvic trying to get up and over.

6:19:25 (22765s)

Angle cut off by Levy. Bringing that knee higher up to the shoulder. Trying to control that that arm. She will flatten her back out. Looking for the It almost look like she's looking for the Dagistani handcuff. Dagistani handcuff.

6:19:45 (22785s)

grabbing around the back and securing the wrist. And what that would do, doing that from a closed guard situation, is it really allows her to be able to sweep from the bottom, you need two hands. If you tie up one hand, there's no real way you could sweep. That would allow that secondary hand to be able to be used to open the guard. Could put your hips in position to go for really traditional technique such as the Salo pass, which we saw Marcus Bush do to Tex Johnson at the World Championship,
