Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	6:40:05 to 6:49:45 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 6:40:05-6:50:05, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 6:40:05 to 6:49:45.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

6:40:05 (24005s)

[Applause] You have you

6:40:25 (24025s)

Hey, you're the only one with the offensive move. Entire match. That guillotine counts. Yeah. Heat.

6:40:45 (24045s)

(no narration in this window)

6:41:05 (24065s)

You okay? Yeah. Heat.

6:41:25 (24085s)

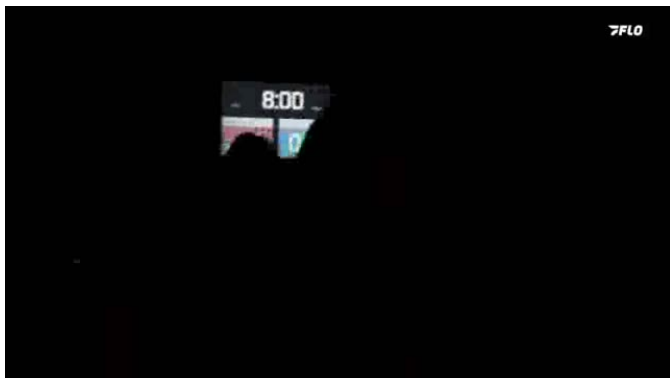

[Applause]

6:41:45 (24105s)

Let's go. [Applause]

6:42:05 (24125s)

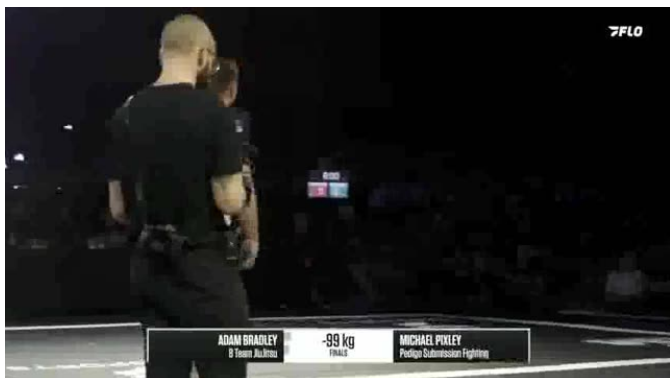

[Music] Please welcome Michael Pixley. [Music] [Music]

6:42:25 (24145s)

[Applause] I'm just trying to get richer. [Music]

6:42:45 (24165s)

Fighting out of the red corner from San Diego representing B team JiuJitsu, the real Adam Bradley. Fighting out of the blue corner from Granite, Illinois, twotime college national wrestling champion represented Mission Fighting, Michael Pixley.

6:43:05 (24185s)

(no narration in this window)

6:43:25 (24205s)

All right, ladies and gentlemen, we're back once again. Adam Bradley, Michael Pixley. Adam very upright. Needs to be a little bit more careful, I think, with the wrestling pedigree of Michael Pixley, Jay. Yeah. Well, Bradley is definitely, you know, the veteran of the sport with these two. Michael Pixley, uh, has a big foot sweep, heck of a specialty. I mean, I'm sure Bradley isn't, you know, now Bradley's able to use this bottom position, right, where he's probably going to be strongest against somebody like Pixley.

6:43:45 (24225s)

So, the taked down, there's no points, so he doesn't have to worry about the points, and it got him to the bottom position. Look at this aggressive passing by Michael Pixley, though. North South again, that's that loose passing when you know, if you're Pixley and know that

6:44:05 (24245s)

maybe a weakness could be the legs, right? Why put yourself down into that position with Bradley stays on his feet, able to get himself north south where he has way less vulnerabilities from here? And with arms like that, Darces, anacondas, things like that are going to be much easier to sync up as you have somebody turtling like trying

6:44:25 (24265s)

to not get mounted, not get their back taken. A great build for the athletic too. Beautiful foot sweep to put Bradley to the mat. And now he's north south here. And you know, one thing this rule set also does, these judges won't let you just stay in like a dominant position or if you're the one up in points. They won't let you just sit there and try to

6:44:45 (24285s)

cook it. You know, tight north south here. And there you see the the called action on the top player. They want him to be since he's the one in the driver's seat.

6:45:05 (24305s)

They want him to continue to try to advance position, continue to try to finish. Looking on a north south choke here, Jake, he's got that head facing the other way. You see Bradley trying to turn his head in. Man, Pixley good control on the opposite side, too. You see his right arm over

6:45:25 (24325s)

hooked on Bradley's arm. So, he's making Bradley have to fight this with a single arm. You see him trying to punch it in to try to move the head away. Create enough space where he can at least turn his head in. But again, where is he going to turn? He's going to turn in and allow his back to be shown. It might give up Darces. There you go. He'll

6:45:45 (24345s)

release it. Pixley back to the feet in the corner of Pixley is Heath Pedigo as well as Jacob Spatzilla Brooks. And again, this distance here, right? Bradley needs Pixley close to him. He needs connection. Needs to get underneath him. So Pixley pay playing from this bit of distance and being able

6:46:05 (24365s)

to move to the outside is definitely going to play into his advantage as far as what Bradley is able to do to him. Again, it's another one of those ways to win. You know, Bradley's ways to win are more than likely going to be into the legs or some type of off back take, something like that. And I think these type of passes keep him away from being underneath of you.

6:46:25 (24385s)

And it's fatiguing to be that person on the bottom constantly having to regard somebody walking towards your head. And Bradley definitely a very technical competitor. Perhaps if you're looking in terms of jiu-jitsu versus jiu-jitsu might have a slight edge, but Pixley, this game plan is definitely working out for him. And he has had this strategy.

6:46:45 (24405s)

He's had a lot of matches like this. Adam Bradley in the semi-final had a match that was not at all like this versus Cal. Yeah. And again and not that Pixie couldn't step into points are on now. Here we go. The crowd loves loves calling points. Get involved.

6:47:05 (24425s)

Now Pixley had a lot of success with that around style passing earlier very early on in the match able to make that opportunity happen for himself. Yeah. Gripping up here now. And and again, you see Pixley's not just going one side, right? He's going right side, then he's going left side. Then he'll just bring

6:47:25 (24445s)

that knee inside. Just giving all these different looks. So Bradley's not sure which one is going to be a full-on blitz. Mixing it back and forth between lifting the legs, snapping down the head, now looking for a double under attempt. Look at the activity of Michael Pixley.

6:47:45 (24465s)

Bradley was just waiting right soon as he got close enough. And that's what I mean. When you get in Bradley's striking distance, that's where he's going to be able to look for the back. That's where he's going to be able to look to enter a leg. And as soon as he had that distance managed, he went for the attack. That's what I'm saying. It's not like Pixley can't split squat and pass here, right?

6:48:05 (24485s)

I think it's that it's in his best interest to not. You're giving Bradley opportunities by putting your knee inside his legs. There it goes. Look at the speed and to And that's what I mean. Look at the effort that has to go into trying to just rear from here.

6:48:25 (24505s)

Bradley doing a a good job getting that foot across again. He's got Pixley, controlling that top foot. So difficult to wrap up Michael Pixley as well. Even though he's waiting for Pixley to come in and and give these aggressive pass attempts, it's still can't quite get a hold of him. Yeah, I think moving towards Pixley might create more of a urgency for Pixley to have to

6:48:45 (24525s)

move when he wants. Bradley seems, you know, okay with being in this spot here. I would say here like having to go into overtime where you're going to have to stand this eye. This is a good opportunity for Pixley. Bradley over again looking for that opportunity to make connection to a leg. He's got the connection on the leg.

6:49:05 (24545s)

Needs to keep the knee frame. Yeah, he's getting doing a good job of pummeling his shoulder underneath, but he does have the the uh right leg already pummeled under keeping the pressure as Michael Pixley, but back re-engaging back to neutral. Tight battle and I think that was the best decision for Pixley in that moment. Was he close to getting to a pass? For sure, but you're leaving yourself where Bradley

6:49:25 (24565s)

can do something to counter and put you in danger. Back yourself out. Restart the process. Especially so close to overtime when you know Bradley's going to have to stand with you to start. Oh, look at this. Nice cut through. Deep under hook. Tommy doing the knee. Oh, he's through.

6:49:45 (24585s)

Forcing Adam out of Bradley to turtle and looking for the hooks. Will he take the back here? Michael Pixley has one hook in that bottom leg is dangerously close to getting through. Bradley, good job pushing it away here. And again, you saw Oh, look at this. He might be able to He might be able to come up on top here. Bradley trying to turn hard. He will save him. Oh, and back in the back situation. One hook in again.
