Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	26, one every 20s
Covers	6:50:05 to 6:58:25 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 6:50:05-6:58:49, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 6:50:05 to 6:58:25.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

6:50:05 (24605s)

Oh, that that leg of Pixley. You see Bradley trying to use his leg to block it on the hunt and Michael Pixley looks like he might be able to take the back. 45 seconds in regulation. The overfocus of not letting that hook go in from Bradley just so that he see Bradley trying to sit through to a guard here and he will get himself in a safer

6:50:25 (24625s)

position. Pixley was looking for that power half to try to force the back situation. Now Adam Bradley finds up in the deep half guard. And man, what a And listen, that whole everything that happened there for Pixley was set up by the previous seven minutes by the fatiguing, the constant back and forth to once he just got him to turtle once deep half here. Oh, look at this. Oh my goodness. Oh my goodness.

6:50:45 (24645s)

Oh, he's going to score. He's going to score, Jake. This is going to be Canad. Let's see. Pixley trying to turtle. Did he hold off?

6:51:05 (24665s)

No, it's overtime. Didn't do enough. Oh my goodness. Pixley did what he needed to do and keeping himself away to not let himself flatten out for the score. And they're calling for the overtime here. Much to Adam Bradley chagrin, man. And Bradley put a move on there late.

6:51:25 (24685s)

And now the wrestler looks to fire back. [Music] Four minutes. Now, unlike what happened in the in the beginning of the match, Bradley cannot concede a takedown here.

6:51:45 (24705s)

He will get scored on if he gets put to his butt here. Man, what an effort by Adam Bradley. That was so close. And it was the effort of Pixley of not letting himself get flattened out. Not letting himself more than anything be under control. Could you just 75% rule? So no. So 75% on is for the pass for for the sweep. It's you have to turn him from bottom to top where you're chest to chest and controlling him.

6:52:05 (24725s)

Pixley's pushing away. Pixley's constant turning. Never allowed a real dominant control. Understood. That's helpful insight for the people at home. Exciting though. My goodness. There is a difference between a sweep and a take down.

6:52:25 (24745s)

Oh yeah, and a guard pass rather. And listen, I will say this though, Bradley has done a very good job of of now giving himself a real opportunity in a judges decision if he can go without being scored on here.

6:52:45 (24765s)

Bradley appeared very confident on the break there making eye contact with Nikki Ryan in the corner. See that left hand down, blocked, ready to go. He's waiting for the Pixley shot. Fundamentals. Yeah, that left hand. You see it staying a bit lower now. He's got it tied up.

6:53:05 (24785s)

Encouragement in the corner from Spatzilla. Fatsk is the best encouragement. He literally said, "You're the man, bro." [Music] Some faints here. All right,

6:53:25 (24805s)

[Music] [Applause] we're almost 10 minutes in here. Final two minutes of this overtime remains. Bradley collar ties. Overtie here from Pixley. Oh, looking for the shot.

6:53:45 (24825s)

Man, I I almost think that Pixley had the crowd in mind there that he didn't want to hurt anybody because he kind of stopped his motion before they went. Warning for Bradley for action. It's not a good look going into the final frame, the final 1 minute 30 seconds.

6:54:05 (24845s)

Yeah. So, you get two warnings. Once the two warnings are used up, that's when you start getting negative points for passivity. Uh I I will say like the warning will not weigh in to the judge's decision. You know, a warning is a warning. Once they start getting negatives, obviously it's affecting the score now, but the warnings don't actually play into unless

6:54:25 (24865s)

it's like a dead even, you know, a dead even tie. And Bradley throw by foot sweep attempt. Big swing and a miss. Final minute. [Music] [Applause] Both these guys amazing runs to get themselves here in on the single by Adam Bradley. Single leg attempt.

6:54:45 (24885s)

And here's this Darth situation we were talking about. And look at Bradley clearing his left arm all the way out. Oh. Oh, getting turned. What? Great offense and defense from Bradley.

6:55:05 (24905s)

Pixley. Now it's Adam Bradley throwing in more collar ties. And we're at 30 seconds here, Jake. Man, could we go into our like second tightly contested gosh judges decision?

6:55:25 (24925s)

Lot of support for Michael Pixley. Yeah, Daisy Fresh Crew is here strong. Another attempt from Bradley to get in on a leg and we're on short time. In on a leg again is Bradley. You know, hey. Wow. And we're going to see once again what the judges decide.

6:55:45 (24945s)

Will it be Adam Bradley or Michael Pixley in the under 99 kg division final? All right, quick decision. Oh, this one was a quick one. All right, let's see. And Michael Pixley of Pedigo Division Fighting is going to the T-Mobile Arena. He's the West Coast Trials Champion.

6:56:05 (24965s)

Jacob Couch is going absolutely nuts for his teammate. What a performance by that man. So many great great matches throughout the weekend and Pedigo Submission Fighting. Such a tight-knit family.

6:56:25 (24985s)

What a cool thing to watch there. Couch hugging Pixley. So happy to him and his teammate. And let's take a look at some of the action. The real Adam Bradley put up a valiant effort versus Michael Pixley. This was a very tight passing situation. Knee going

6:56:45 (25005s)

through deep under hook. Bradley forced the turtle. And this looked like it could have sealed a deal for Adam Bradley. But look at Pixley keeping up on his elbow at the end of the sweep there. Adam Bradley trying to stay active, trying to keep the momentum in his favor in the overtime rounds, but it was Pedigo Submission Fighting's Michael Pixley that was able to get the job done. That's our under 99 kg division final. Michael Pixley is going to the team.

6:57:05 (25025s)

(no narration in this window)

6:57:25 (25045s)

You want to sit here? No, it's okay. I'll stay right here because I don't want to be in front of the camera. Okay.

6:57:45 (25065s)

[Music]

6:58:05 (25085s)

Rodriguez. Ladies and gentlemen, coming out to the mat right now is Jacob Rodriguez. In my excitement, Jay Rego. Joining me on the mic. I said that Andrew Tacket was going and it would be the under 77 kg division final. My bad. Everything is happening so exciting here at the Westgate

6:58:25 (25105s)

Ballroom. It is William Tacket versus Jacob Rodriguez in the under 88 kilogram division final. And Jay, this is a rematch of a match that happened at the East Coast trials. A battle between two West Coast trials champions. Yeah. Uh JRod uh came off that loss to Jacob Couch where he got ankle locked
