Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	23, one every 20s
Covers	7:03:43 to 7:11:03 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 7:03:43-7:11:14, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 7:03:43 to 7:11:03.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

7:03:43 (25423s)

mean a really Great battle and a lot of fun moments, especially at the beginning. JRod and William Tacket exchanging back control on a few different occasions. Jacob Rodriguez nearly making good use of that passing. But look, he gets his hand over the top and turns it into sort of a hybrid of a toe hold and a heel hook.

7:04:03 (25443s)

So much torque and pressure on that. I mean, when you need the torque for this to be toes going down to the butt, what better way than to get that other hand that's further away that can pull it even harder down. Fantastic work.

7:04:23 (25463s)

Showing you how even if this rule set takes it all the way the distance, it can be exciting. If it's just a points win, it could be exciting. If it's a submission, obviously they're always exciting. Uh, and this tournament has just been that the entire weekend. You know, even the open Friday was just packed with talent, man. Everybody wants a piece of ADCC.

7:04:43 (25483s)

And this man, Oliver Taza, no stranger to the biggest stages in the world coming into this tournament, Jay. Yeah, he had an abs he has an absolutely crazy statistic. Out of 166 wins coming into the West Coast Trials, he has 100 submissions. That's a 60% submission rate. We'll see if he can put that to use and add to that statistic against

7:05:03 (25503s)

this man, Andrew Tacket, who has seemingly become more powerful with every cheer of the crowd. Just gaining momentum like a snowball going down a hill. Brother of 88 kg champion William Tacket is Andrew Tacket looking for his first

7:05:23 (25523s)

bid for the World Championships. got a handful in front of him with Taza. One of the most exciting grapplers on the planet in Andrew Tacket. Those you guys who tuned in to who's number one when Andrew Tacket fought in the bracket on the night of champions

7:05:43 (25543s)

had a match with PJ Barge that was so epic he threw out his back. Yeah. And was forced to be sidelined from competition for a little bit. That's what kept him out of East Coast. Came back to West Coast. Now he's in the final. Yeah. Andrew C.

7:06:03 (25563s)

Andy have fun. Tack hitting Taza. Heavy on the heavy on the head right off the start. Feel that elbow. Ta possesses such great wrestling fundamentals. Yeah. saw him in his match versus Tynan Dalbra just really was able to mitigate a lot of what Tynan was doing for a large portion of the match just just with this very simple style that he has. He's a great single leg.

7:06:23 (25583s)

Andrew Tacket is able to create situations off of his wrestling that leads a lot of the times to the back and some pretty dynamic submission entries as well. Yeah, you kind of see that whole new wave team with that, you know, same very intelligent hand fighting system. Uh,

7:06:43 (25603s)

it fatigues, it sets up, it creates angles, it creates, right? It creates unevens where when I can make those shoulders turn, now I can move. Now I can get to the leg. Now I can get to the hip. Simplifies the process, especially when you're not going against another traditional wrestler.

7:07:03 (25623s)

Well, if you think about it, I mean, John Danaher has been in the corner of some of MMA's greatest. I mean, George St. Pierre, for instance, known as perhaps the greatest wrestler in MMA of all time. Never even wrestled. And so, New Wave is getting a lot of that same wisdom. Taza pops back up.

7:07:23 (25643s)

A lot of heavy hitters in the New Wave corner. Helena Crabar, 80C West Coast Strow champion this weekend. Dan Monosyu going to Worlds. Gary Tonin, John Carlo Padonion. Cody Steel, William Tackett in the corner of Andrew Tackett. Oh, look at this.

7:07:43 (25663s)

Jumps into a leg, but that is going to get him the negative if he doesn't get back up. Just he does. Just throwing. Definitely chanced it there. Who does that? Yeah. In the finals of ADC West Coast Trials chances it. I got nervous for a second like does he know

7:08:03 (25683s)

again? Even the flying submissions, even jumping to an arbar, jumping to jumping to a guillotine in the corner. Vander Tacket right there. William Tacket, who we just saw win by dynamic submission with that toe hold, heel hook combo on Jacob Rodriguez.

7:08:23 (25703s)

Little faint there from Tacket. Zaza looking for that under hook. He'll take that under hook and then he'll run it across the body trying to tap that far side knee. Tweek one now.

7:08:43 (25723s)

Big double leg by Andrew Tack. It lands directly inside control. Now again, there's not going to be any points for that. Taza is not penalized for not being the bottom player. Anything like that. Uh got to fix the hair. Always.

7:09:03 (25743s)

[Applause] Andrew is such a good kid. near frame. Taza starting to off trying to off balance the far side. You see him vgrpping on that armpit. He'll try to push away

7:09:23 (25763s)

from him just to clear the space to come back to the inside. You'll see hard push away and tack it. Very smart. Followed him around to that side. Look at the back take sits. Look at this. He might almost be there. Jake, good job at Taza turning through and opting to stay on the bottom just from a much better position than he was in before.

7:09:43 (25783s)

40 seconds until points. Holding on to that ankle. Inverts through. Good job from top from Tackett of keeping that top leg away. You see that V-grip on that far side leg. Needs to keep the leg separated. Trying to walk out of the leg and think of a situation and he does. 20 seconds till points.

7:10:03 (25803s)

Oh, and Taza chooses to stand back up, especially with 20 seconds to go here. Just shows you the confidence Taza has in his wrestling, you know, cuz he can't he can't just sit now. All right, single leg attempt from Taza. Look at this beautiful single trying to follow it.

7:10:23 (25823s)

Going right out of bounds and crashing into Trey Robinson. A float grappling. Trey turned the shoulder. Looked like he was going to try to drop him. points big shot from attack is heating up Jay and you see

7:10:43 (25843s)

you see both getting oh picks up the legs is so good at that too just quick little pickups on the leg it's so simple he just reaches down sort of like Ben Asin just reaches down for that single leg and makes it happen trying cradled off here trying to put him on his back stand back up. Smart by Tackett.

7:11:03 (25863s)

Yeah, Taza would have been okay at that point to pull. This is the third. This is the third successful single leg by Taza. Taza staying on it, keeping that leg. And when he's keeping that near side leg. Oh, and look at Andrew T with the athletic movement to regain top position and force the back.
