Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	7:15:29 to 7:25:09 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 7:15:29-7:25:29, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 7:15:29 to 7:25:09.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

7:15:29 (26129s)

So here's a look, Jay. That daring attempt earlier on. It was in the match by Andrew Tacket. The man did it pay off. And then there was this double right into side control. Taza has remained so aggressive and this looked like a great opportunity for him to potentially take the match. But Andrew Tacket is so creative. It's so

7:15:49 (26149s)

unorthodox. It's hard to prepare for any of the movements that he does. Takes the back, right? Not to get scored on. What's Taza got to do? Show him his back. Exactly. You talked about that a lot this weekend. It's just such an important part of the ADCC rule set. I mean, when you think about takedowns, sweeps, neon belly, mount, you think of all those scoring situations. I'm gonna tell you that the back scores more than all of them combined.

7:16:09 (26169s)

DeAndre Corb and Keith Pakorin is our final. Yeah, listen. Keith, multiple time ADCC veteran uh multiple time trials champion, multipletime uh uh silver medalist in the tournament as well. Took fourth at West Coast or I'm sorry, at East Coast taking on DeAndre Corby.

7:16:29 (26189s)

Corby's first bid here at the finals of a of a trials. Again, very wellrounded. Here's Corby taking out his brother Gavin in the semifinals.

7:16:49 (26209s)

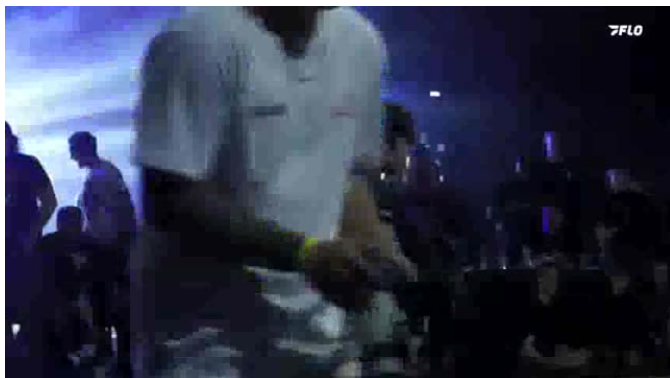

Very technical. In the corner, DeAndre Corb is Greg Saunders. And Keith Cororan of 10th Planet is coming down to the mat. Keith defeated Josh Cneros in the final of the West Coast Trials that we had mentioned before. He's a very balanced

7:17:09 (26229s)

approach. Utilizes very effective leg attacks, but is able to get up on the wrestling uh get up on wrestling attacks so effectively as well. It's just a very balanced and a great mix, I would say, in terms of styles. Yeah, great wrestling, really good wrestling, very good, you know, passer. Very good, very dynamic from the bottom.

7:17:29 (26249s)

known as one of the best leg lockers in the weight class for sure. So Keith comes into this final, Jay, with a 100% submission rate at the West Coast Trials. That is the that is even more momentum than he was coming into last trials with that he won in 2022.

7:17:49 (26269s)

He's going to need all the momentum in the world to take out that man. Black and white for Corby. Black and gold for Corby. DeAndre Corby and fighting out of the blue corner from San Diego, the 2022 West Coast Trial 66 kg champion representing the planet, Keith Cororan.

7:18:09 (26289s)

[Applause] All right, Creoran Corbynz ready to get us underway. Here we go. Final match of the day.

7:18:29 (26309s)

DeAndre Corvette, a fivetime ADC Open gold medalist is in Atlantic City, Toronto, Canada, Ottawa, Canada, Denver, and Dallas. World traveler. Ah, he put the work in. He put the work in to get the experience in the rule set and it's clearly paid off.

7:18:49 (26329s)

One thing that I mentioned in their semi-final match that we got to commentate earlier today where Gavin Corb and DeAndre Corb actually squared off. They are both full-time engineers. Yeah, they train when they're done work. Both so talented. Had an opportunity to talk with Greg Saunders about the kind of lifestyle that they live and the word that he used. He said, "If I could describe them

7:19:09 (26349s)

in one word, it is disciplined. They take everything incredibly seriously. Their sleep, they don't waste a minute of their day." Coran almost on the front head. Oh, nice. Look, a little throw by and faint to that backside leg. Cororan in on a shot trying to come up with it.

7:19:29 (26369s)

Has a hook around the left leg. Yeah, he'll safely get himself to the ground. You really noticed that he knows the rule set of 80CC. Well, he did stick to that for over three seconds.

7:19:49 (26389s)

They might not have pushed enough. I'm trying to see if they Yeah, they did. They are giving him the negative. I rescind my previous statement. Yeah. And again, what they're looking for is you to attempt a taked down, pick up a leg, drive into it. You know what I mean? for for 3 seconds. Now listen,

7:20:09 (26409s)

when you're out there 1 1 2 1 100 3 100, your heart's beating. That seems like it's happening a lot faster than it really is. And he just took to that bottom position a bit too early and already getting an action call on top, too. So they're not they're not waiting.

7:20:29 (26429s)

So Corby currently in the lead by negative one. Corby staying tight. He doesn't have uh his hands clasped together. He just has a his left arm very deep underneath with that top arm trapped to Correoran on the lock down and he's got both hand clasped around

7:20:49 (26449s)

that leg and he's going to try to start, you know, whipping where he's going to try to bring the weight forward. A second action call on top and an action means nothing. It just means get working kind of thing. It's not a warning or anything like that. Uh it doesn't play into any kind of decision.

7:21:09 (26469s)

It's just I need you to keep working. And again, like I said, especially when you're the person who's in the lead. Like the one thing they're not going to let you do is pull back. You know, DeAndre very explosive. One little opening can turn into so much. You see it right there trying to pass that arm through. Pass to the outside.

7:21:29 (26489s)

Coran locks off. Yeah. He locks off the this reverse guard here or no he is between the legs. So he's trying to get Ashid up here to the outside now. Spinning underneath in on a leg. Corby pushes that weight forward

7:21:49 (26509s)

[Music] trying to get that foot hidden but Keith this is where Keith wants to be. Passing it off and on the leg still DeAndre trying to move side to side trying to keep that foot high too. You see how he keeps trying to push that either into the armpit or up by his head. Just trying to keep it out of harm's way. See him sliding that leg.

7:22:09 (26529s)

You see Tacket do that. A lot of William Tacket's very good at that. Sliding that foot all the way up past the armpit so it stays out of harm's way. And DeAndre Corb hiding his heel by pointing his toes completely away from Keith. That leads to what a lot of people call the running escape. Yeah. Now he's 5050 off here. Man, that went quick that four minutes. Oh my gosh. I know.

7:22:29 (26549s)

left. You You spoke about the heartbeat seeming like time is going faster than it is. I feel like my heart's been beating this entire match. Trying to spin for the back. DeAndre Corb. Oh, and he's got the seat belt. He's got that upper body control. Let's see how patient he is here. Cororan trying to block that bottom hip. Trying to make himself small and shrink out of

7:22:49 (26569s)

there. Corby, is he trying to square off the hips? Is he seat belted? He's seat belted. So he does have an arm that's over the shoulder that keep Keith might be able to sneak out the back door in. Oh, Corby's not even looking for the DeAndre Corb really likes to throw this triangle from the back position. He's so effective with it. And now flattening Keith out.

7:23:09 (26589s)

They're looking for the choke. Keith trying to push that far side leg out and he does get his three. What a moment for DeAndre Corb. Corby technically up by four here, right? because that point negative is just like it seems, right? It's just a minus point. So, Corby up by four.

7:23:29 (26609s)

Such a strong competitor in this under 66 kg division. Really is. And now again, you're in that situation where there's 2 minutes and 40 seconds to go. You scored, you know, twice just to get this thing back tied.

7:23:49 (26629s)

And this whole situation happened off of him taking the back off of Keith Pakor's leg. Leg attack. Correct. Yeah. Well, like you were saying, he's explosive now. He's got a hook out. If he were to insert this hook back in, he would score again.

7:24:09 (26649s)

Keith down by that left knee high. Rotate all the way through, Keith. Tight head and arm position here for Corby. He's going to try to enter again and he does.

7:24:29 (26669s)

I don't know if that was in long enough here. And I did he didn't figure four off yet. Now he's going to score again. And he's going to be he's going to be up six points. Correct with a negative. So he's up seven right now. Oh my goodness. Yeah, that is that's a lot to make up for. Oh, flattens him out here.

7:24:49 (26689s)

Heavy pressure coming forward for Corby. Trying to labor Kirkin's ability to spin through, build height, everything like that. Just fight the leg.

7:25:09 (26709s)

We got a minute 15 to go here in the 66 kilogram pound 66 kg final. Corby on the back of Cororan and the door slowly closing for Keith Cororan to make the comeback. Yeah, it's just such a tough spot to get out of. I mean, you you have to go through so many different motions.
