Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	1:00:00 to 1:09:40 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 1:00:00-1:10:00, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 1:00:00 to 1:09:40.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

1:00:00 (3600s)

host of the Tapping In. He asked me to say that. Drop that. But here we go. He'll be ushering in the next championship match. Alex Grandandy right in on it.

1:00:20 (3620s)

He gives a big smile. And now I'll head out to Paul. Both these guys just as nice as they could be off the mats, but both very, very aggressive players on the mat. Particularly Grandandy. Little gamesmanship here from both guys. Ardella offering the foot, asking Grandandy to take the single leg.

1:00:40 (3640s)

Paul very confident in his wrestling ability. He should be. He's got a great pedigree and he's got the proven results of being able to win this tournament multiple times.

1:01:00 (3660s)

Grandandy takes that ankle, rips it out from underneath and ball right where he seemingly wanted to be. Now, that was a moment sort of similar to the one between Gordon Ryan and Nikki Rod in the finals of ADCC 2022 in their division.

1:01:20 (3680s)

If you're Grandandy here, you got to be super careful that you don't let Paul get underneath you, create elevation, get under the hips. You know, until the last run of his at 80cc trials, we really didn't recognize him as a powerful leg locker, but after that last run, he came out and he was just smoking people with his leg game.

1:01:40 (3700s)

So, Grandee is going to have to be very, very careful. It's a dangerous thing to be able to both play an aggressive dangerous guard, especially one in which you could do a leg lock shootout and win. That's why champion here. Well, and have the wrestling ability that he does. He can do everything.

1:02:00 (3720s)

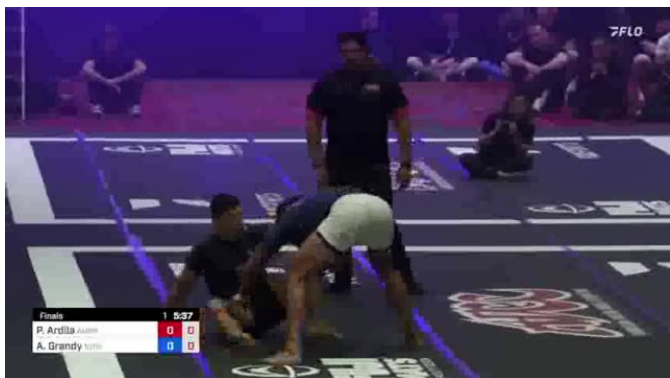

Grandandy approaching the guard very low. I think that's the right approach. Hips are back, but he's gonna have to be careful that he doesn't get warned for stalling. He's going to have to come forward.

1:02:20 (3740s)

Artilla grip on the head. Grandandy backs out. Granny true to form keeping the heavy collar ties active even from this top position. Yeah, he's just non-stop with those collar ties. Our dealer working the arm drag. Randy ripping out of there and he'll try to pass from standing. I

1:02:40 (3760s)

wouldn't be surprised to see him come back down here. Minute 30 seconds to point and Granon needs to be careful not to incur a penalty possibly for disengaging too much.

1:03:00 (3780s)

I agree with that. Our dealer working this arm drag again gets a little bit of an offbalance and that's where he's very dangerous. He just needs a little bit of an opening. He can outside heel hook. He can run to the inside heel hook. Again, he does it all. He's a very talented submission artist.

1:03:20 (3800s)

Like Grandandy was thinking about working to a double unders pass. He's keeping his left arm stapled on the leg. Arndt tries to drag him in with a triangle attack. Grandy, good pot. And here he goes. That's all the space that he needs to create some movement and gets his hands clashed together.

1:03:40 (3820s)

Gets the offbalance. This is Paul Arndt's world. And if you had to say that Grandandy had a weakness in one area, it's definitely going to be in his leg lock defense. Kneeling appears to be secured. Here's the outside heel. He got it. That's it.

1:04:00 (3840s)

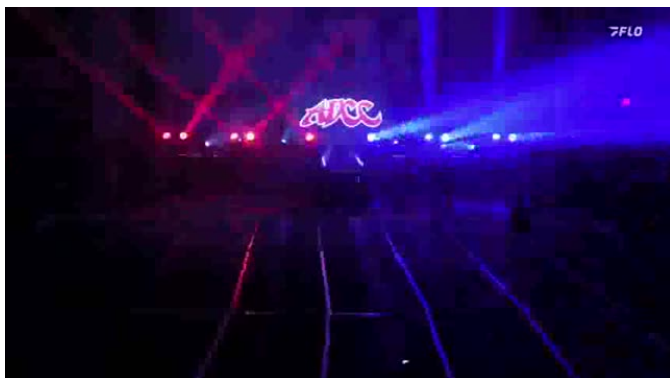

Paul Ardella once again an ADCC Trials champion. The moment he got what he was looking for, Brandon, that's all it took. One moment. Just one small offbalance, one leg entry, secures the knee line,

1:04:20 (3860s)

outside heel hook. Beautiful work, Paul Ardila showing why nobody can stop him at the trials. Just constantly coming out on top year after year after year. Really incredible stuff out of Paul Ardella coming out of the dirty south Atlanta.

1:04:40 (3880s)

Absolutely. Well, ladies and gentlemen, in between each of these finals, we're going to cut to a small break. So, we'll see you for our next championship here in just a little bit. Be right back. It's time for welcome. [Applause]

1:05:00 (3900s)

Elder Cruz making his way to the Mat El Monstro coming off of a victory versus William Tacket to punch his ticket to the final. Oh my goodness. The camera made it look like he fell off the stage right there, but he gracefully makes his way to the mat. I'm excited for this one, Brandon McCather.

1:05:20 (3920s)

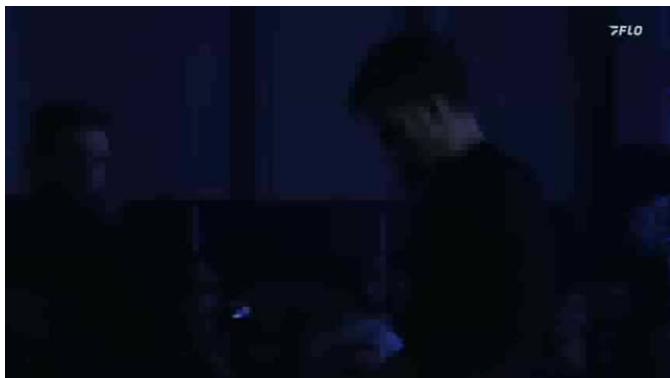

Yeah, and Cruz has looked great this weekend. You know, we're normally used to seeing Cruz play a little bit of a conservative game, but he was on the attack for a lot of his matches today. We normally see him come out, play it kind of slow, play

1:05:40 (3940s)

a counter game, strong wrestling, of course, but a couple of these guys this weekend, he just blew right through them. But man, I sort of feel like the gods are with Jacob Couch this weekend, man. That big win over JROD with the submission.

1:06:00 (3960s)

He's looked phenomenal in every matchup he's had. And look at him just soak it in. The crowd loves Jacob Couch and rightfully so. He's a sweetheart of a kid and he's a phenomenal guy from California22C.

1:06:20 (3980s)

[Applause] [Music] They're eye to eye, head to head already. They're ready to rock and roll, Jake. They're intense, man.

1:06:40 (4000s)

Look at that. And here we go. We're off to the races. Jacob Couch, Elder Cruz. As you guys could hear, Jacob Couch, beloved of the crowd here. Cruz quickly onto the single leg. Not much resistance from Couch. Happy to play with his guard. Of course, his

1:07:00 (4020s)

guard absolutely incredible. Great leg attacks. Great close guard as well. Cruz backing up as Couch moves forward.

1:07:20 (4040s)

Couch submitted Jay Rodriguez with a straight ankle lock in the semifinal. that's any indication of what Elder Cruz needs to be on the lookout for. Like we had mentioned versus William Tackett, it was the it was the competitive awareness of Elder Cruz that really made it possible for him

1:07:40 (4060s)

in that match. I mean, he looked so mature, so patient, looking for his opportunities. He's going to need to be very aware versus a competitor like Jacob Couch. and he was aggressive when he been one of the criticisms of Cruz in the past is just sometimes just not coming forward when he needs to come forward. Does usually find a way to win though.

1:08:00 (4080s)

Yeah. Responding to that criticism, Brandon, leading up to his match, we mentioned this earlier on the broadcast today that leading up to his match in Oklahoma City versus Rafael Lovato Jr., he had said he knows that he hasn't got a lot of submissions and he wants to start finishing people. He wants to be a finisher. He's been working on that part

1:08:20 (4100s)

of his game. He's been working on that part of his mentality. And we're I mean, he's always been aggressive. He's always been a game competitor, someone that you consider elite, an EDCC veteran. But he's going to continue, I think, to build that. You see Jacob Couch making it apparent to the people watching, he is the one trying to to lift the leg there.

1:08:40 (4120s)

Couch takes the grip. Pulls him in. Playing with this half guard. Got the traditional half, but Couch all the way up on his side. Cruz trying to get that right hand into position so he can cross face. Now goes to wrap the back with the left hand. Jacob got to be careful right here. He doesn't get flattened out against a guy like Elder.

1:09:00 (4140s)

He's looking to scoop that outside leg. use this to get up. Get up and later. Jacob really employing an old school game here, this traditional half guard, but he's been able to successfully use it to keep Cruz off of him.

1:09:20 (4160s)

Does a great job of staying up on his side. Cruz aggressively covering the face. Jacob reaches across two cross grip. Roll that wrist.

1:09:40 (4180s)

back to it. Don't let him scoop it. Couch gained a lot of fame in the community being one of the stars of the flow grappling produced Michael Sears produced I would say documentary Daisy Fresh but is available on flow grappling right now. Couch works back into his closed guard and he's very good here. Let's break this guard. Kard
