## How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 1:26:13 to 1:35:53.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

|                         |                                                                               |
|-------------------------|-------------------------------------------------------------------------------|
| <code>ts</code>         | integer seconds, video-absolute                                               |
| <code>label</code>      | a technique name, taken verbatim from the label list                          |
| <code>actor</code>      | which competitor did it, by name                                              |
| <code>successful</code> | true if it landed, false if attempted and stopped                             |
| <code>type</code>       | one of: control, submission, guard, takedown, pass, transition, sweep, escape |
| <code>points</code>     | points the scoreboard awarded for THIS action; omit if you cannot read it     |

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

1:26:13 (5173s)

This is a big score right here. Let's see. I don't think they're going to score it for him. Nikki Ryan possibly looking to get active guard there from turtle position conceding guard. It's almost like you get a reset. Yeah, there was just too much time between the taked down attempt and the match or Nikki going to his

1:26:33 (5193s)

guard. But you got to think that that's a big moment to the judges. Nikki Ryan has 20 seconds perhaps to win back the judges favor here.

1:26:53 (5213s)

10 seconds. Mickey's got to do something. Elijah Dorsey calling for the crowd. Elijah Dorsey is going to win this thing. And you got to think Elijah Dorsey is going to take this one. But it's all up to the ADCC judges.

1:27:13 (5233s)

[Applause] If I'm the judges, I'm definitely going with Dorsey there. Just outworked Nikki. That's really what it came down to. And you could say that it was a very close match for most of it. But when he got the turtle and he got the seat belt position, it was just evident. And it was an easy call for the judges. They didn't take long in deliberating.

1:27:33 (5253s)

They're going to throw up Dorsey's hand. Elijah Dorsey with the big win and he's going to ADCC. And you can see how much it means to him. What an incredible victory over somebody who was taking everybody out of

1:27:53 (5273s)

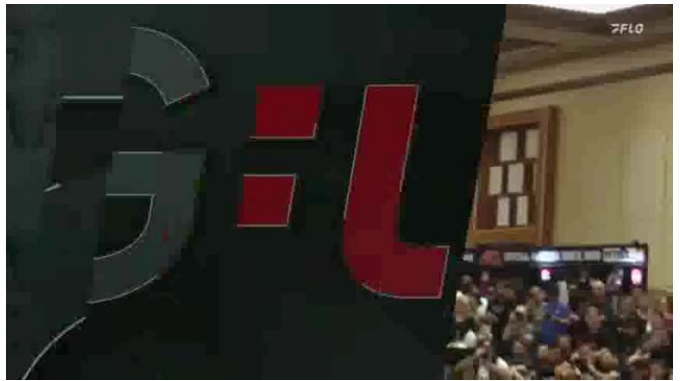

the competition. Just decimating everybody in his path. Nikki Ryan looked incredible. And yet that man, Elijah Dorsey, look at that. What a great moment for Dorsey. Look at just overcome with emotion. All the hard work and now his bags can be packed for ADCC 2024. He will be competing at the biggest show jiu-jitsu

1:28:13 (5293s)

has ever seen in 2024 at the T-Mobile Arena. Here's a replay style. You got to think with the style that he has that he's going to be a factor in the bracket at the big show, too. Dorsy, like I said, right as he walked out, this kid's a winner. He

1:28:33 (5313s)

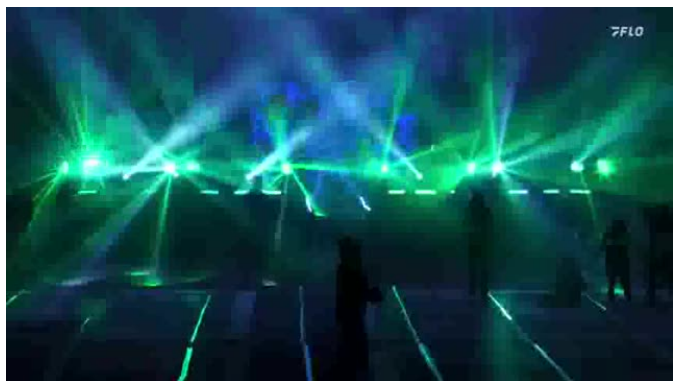

knows how to win and he just found a way to outwork. Look at that. Got deep on the double. Gave us a little highlight here at the end just to make sure that there was no room for doubt at the judges. [Applause] [Music]

1:28:53 (5333s)

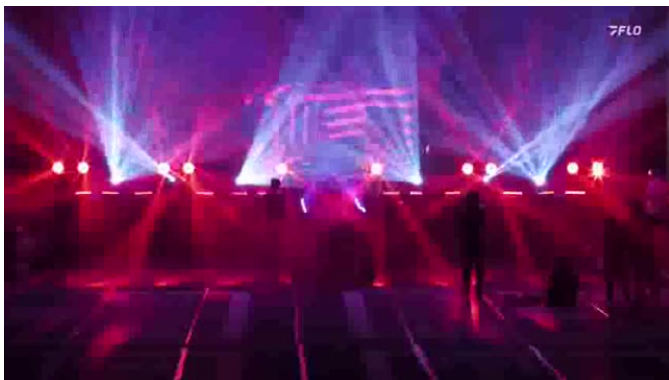

Dominic Mahia, one of the teenagers who went into this under 66 kg division and took it by storm, defeating both of the Corb brothers backto back today. Just an unbelievable run here to the finals.

1:29:13 (5353s)

Took out Keith Creoran to find his way into the final. But he's going to have his hands full. Comes Oliverz.

1:29:33 (5373s)

17-year-old Phenom has looked unstoppable this weekend. It's it's something else to see any competitor with his level of cardio and consistency. He puts on a pace that is so hard to keep up with that we have not seen anybody across his entire

1:29:53 (5393s)

tournament keep up with him. And he's only 17 years old. Brandon, well, what I love about him is, you know, this is not a jiu-jitsu tournament. This is a submission grappling tournament. and he brings the element of real wrestling into this thing. And he's got great jiu-jitsu, too. Make no mistake about it. But it's his wrestling that leads the way with his style. And he's going to give Mahia fits right here.

1:30:13 (5413s)

Mahia's guard is phenomenal. But so is Aan Krellson's. And and Dorian just put the pace and the consistent pressure on Krellson and just wilted him at the end. High school, twotime Texas state wrestling champion.

1:30:33 (5433s)

Let's hear it for the 17year-old. [Music] Here we go. Our last final of the day. BMA, it's been a pleasure. Jake Watson and Brandon McCathan on the mic here. ADCC East Coast Trials at the Avalon Ballroom in Hara's Atlantic City, New Jersey.

1:30:53 (5453s)

Oh, a hard collar tie. My god, I heard that. Oh, takes another shot at it. But Dominic Mahia going for a taked down. And he's got a nice grip on the back of the knee there. Oh, and he gets Dorian down briefly, but Dorian just has no

1:31:13 (5473s)

quit. He continues to wrestle all the way through. I mean, he's just going to be so hard to score on. The best chance that Dominic's going to have is to get to his back in a scramble.

1:31:33 (5493s)

How do you beat Dorian in this rule set? Got to imagine maybe the game plan of Dominic Mia is I mean at least at the start there judging by his immediate takedown attempt to put Dorian on his back perhaps. Well, he may be able to get Dorian off of his feet, but I don't believe he's going to be able to keep him there long enough to score.

1:31:53 (5513s)

But it could be either in one of Dorian's attempts at a takedown or maybe even one of Mahia's attempts at a takedown that he can expose the back or expose a leg. And I think that's going to be Mahia's best shot at winning this match.

1:32:13 (5533s)

Dorian on a couple of occasions has grabbed the rash guard of Dominic Mahia. Thought about a duck and Mahia shuts him out. Mahia with a hard collar.

1:32:33 (5553s)

Another hard collar tie. Oh, and look at that. We go. Mahia with a good reaction. Up and ready to work immediately.

1:32:53 (5573s)

Mahia reaching towards the single, circling to the outside. Dorian does a good job following that circular motion, removing the single leg by Mahia.

1:33:13 (5593s)

faints in and Dominic frames him out. Dorian biting hard on that fake. Yeah, he did.

1:33:33 (5613s)

Just a minute and 30 seconds till the halfway point of this match in which I imagine Dorian Oliver is going to look to turn up the heat here on the takedowns. Punches into that under hook hard. Mahia tried to drop. [Applause]

1:33:53 (5633s)

Dorian presses forward as soon as they re-engage. Mahia again in on a single leg. Turns it into a double. My goodness. Dominic. It's before the points period though. And look at that. Dorian just will not stay down again. He got him off. returns the favor.

1:34:13 (5653s)

And that's what Dominic probably I don't want to say it's what he wanted to happen, but he's not mad that he has to find himself working the guard here. But Dorian's pressure, his passing, his movement on the outside, the lateral movement, switching side to side, pressuring with this north south, it's just going to present a lot of problems for Dominic. Dominic can play.

1:34:33 (5673s)

Look at that. He can play inverted. He can wrestle. He can do everything. Oh my goodness. Dominic Mahia trying to turn that into an arm bar similar to the one he found on Gavin Corb.

1:34:53 (5693s)

Yeah, that was incredible. Of course, the one on Gavin Corb was off of a fireman's carry, but looked similar. His ability to find submissions off of scrambles is really impressive. All right, he's working the front head there. Four minutes and we are into the points now. Look at Ollie Vz. Keeping this incredible pace up.

1:35:13 (5713s)

Misses the Oh my goodness. Domin Mahia. Mahia finds the triangle choke. Oliveira steps over. Will he get this? Oh my goodness. Oh my gosh. Ollie Vz pulling his arm out.

1:35:33 (5733s)

and keeping the pace up undeterred. Mia seated in front of

1:35:53 (5753s)

Mahia feels very comfortable attacking from that inverted position as Dorian moves around towards the north south. That was the place where he really put the heat on Krell.
