Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	2:20:55 to 2:30:35 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 2:20:55-2:30:55, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 2:20:55 to 2:30:35.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

2:20:55 (8455s)

know the final Yeah.

2:21:15 (8475s)

[Applause] Heat. [Applause]

2:21:35 (8495s)

two zero in Leander. He beat on decision. He's very good. He He did a guard. He did a takedowns, you know. So, I think it's going to be a really nice fight.

2:21:55 (8515s)

Jose is a guy that uh he he got a chance to play uh uh top today and he knows how to be really heavy. Let's see how that's going to play out against Asaf. You know, he's really heavy, right? He works on takedowns. The is what's his nickname? Doctor Dr. Pad. Dr. Pada. Yeah.

2:22:15 (8535s)

Okay. And I think he's like 40 years old. I don't know. No, I think he's like big time master and I really like to like see him fight, you know, because he has nothing to prove and then he keep fight and then he tried to go all the

2:22:35 (8555s)

day he fought a big duh high level. Yeah, you know I think it's nice man. I I really like jiu-jitsu is for all groups you know you can be young and then killer and then you can be old and then still killer. Like we have Vagner Hosa here as expect spectator and he's 42 man and I got to train with him sometimes. Big fan of Vagner by the way. He fought he beat me so I could be angry with him but man

2:22:55 (8575s)

he's the he's the he's the man. I I really like him. All right let's see what these guys are going to do. Fighting for that collar tie right there. Asf just pushes Nasu away. And what I said before, the ref, they already told them, "Hey, it's jitu, you know, it's not tapping someone." So they, the ref

2:23:15 (8595s)

already give them some warnings. Okay, no slaps. You can do the tie ups, you know, but no, no, no slaps, Antonio Joseio.

2:23:35 (8615s)

final 80C South American trials straight from Bellow Horizonte, Brazil. Again, the winner punches his ticket to Las Vegas, the world's three times. So, we have a two minutes. They study each other, you know, doing the tie up here on the head. Heavy control.

2:23:55 (8635s)

Soon the refs was going to ask for action for sure. Yeah. The problem with this fight is that uh these guys neither of them wants to pull guard.

2:24:15 (8655s)

They know how heavy how heavy each other can be on top. So they're like I'm having none of that son. Anyways, if you pull guard is minus one. So no one want to have minus one on the final against a really big guy like this. So I think they're going to start the action soon.

2:24:35 (8675s)

They need to huh otherwise going to be warning warning and then negatives both sides. Yeah, the penalties are going to start really soon here. Let's see. And uh they cannot announce the penalties now, but once the points start counting, they will get the penalties. Yeah, for sure. Because it's it's really important to say about the rules is uh the first minutes you don't have points scored on the board.

2:24:55 (8695s)

Are not accounted, but anything you do counts. You know, if you do one attack is one attack to you. So even though you don't have the points, okay, single leg attempts. So even though you don't get to get the points on the first minutes of the fight, first four minutes in this case, you you got to get um some uh honors,

2:25:15 (8715s)

you know, like merits for the fight. So if it ends and then you pass the guy in the first minutes, you get one attack, you know. Uh-huh. So the way I think everyone that wins the trials or the events, they start fighting this is the beginning. They don't waste time.

2:25:35 (8735s)

They don't want to spend any energy either, man. Uh cuz let's say now they try they try to take down, they spend too much energy and they spend energy to get a taked down and then there's no points for it. Yeah, I agree. But imagine if you take someone down, then you have the other one playing guard and You know, no one

2:25:55 (8755s)

okay take down already attacking the neck. It seems like he's got a chin strap there. Other important thing about ADC rules is if you initiate the attack counts much more for you. So Jose Nasu he initiate the attack you know even though as can get like the guillotine or something and then he get out Jose Nasu initiate the

2:26:15 (8775s)

attack you know it's it's a really Oh beautiful he got the corner nice take down no points yet that was absolutely beautiful is way down on his he hip right there he's going to try to take him down again

2:26:35 (8795s)

he wants to nice Okay. I never heard about Jose Nash before, but he's doing really well, man. I saw, as I said, three of his fights he fought my my teammates. Really good job today. Yeah, he's doing really well.

2:26:55 (8815s)

Three minutes left, Marcelo. Three minutes. Yeah, points are on. These guys mean business. Jose has already shown throughout the day and even in this fight that he can take anyone down. And other thing that come that got me attention on him is he has good cardio, you know, and he's big. Good cardio being a big guy.

2:27:15 (8835s)

Yeah, he pushed the pace, you know. It's right. Yeah, for sure. He's doing okay. No heads. One more warning. One more warning. Antonio just had Jose sometimes like they confuse

2:27:35 (8855s)

hard fighting on dirty fighting know this is see they don't allowed you to do dirty fighting you can go hard as hard as you can minus one minus one

2:27:55 (8875s)

okay half guard All right. Well, Antonio was playing guard. Seems like he's attacking attacking the right arm right there. Can't quite see from our angle right here. Let's see if we can get Oh, deep half guard.

2:28:15 (8895s)

Jose Nash is putting the weight on back so he has good balance there. doesn't let Antonio get inside him or get to the deep half. He's trying. He's trying. Okay. He's getting out of off's guard. Talk us through that under hook right there. How important is that under hook for Antonio?

2:28:35 (8915s)

Yeah, he got the under hook. He was going for the coach on Lucas Le guard, but he couldn't do is really heavy on his hand. Oh, that was a good take down. Good take down, but no points. Uh it's really important to say too ADC they don't score. Okay. I think now it's two points. Uh no points.

2:28:55 (8935s)

You need to have 75% of your back on the ground. If you don't have that, that is not Yeah, but I think it was no points because it was not a continuing move. You know, in this you need to go one continuing move and then get the points. There he was doing the take down

2:29:15 (8955s)

and then I set up third position. Every time you go third position for three three seconds on a DCC, it resets the action, you know. So, hey, I can be a judge. I can be a judge. The rules, man. Yeah, we got to we got to know. That's I lost so many fights because of the rules that uh like three, four years ago, I said I need to start learning the

2:29:35 (8975s)

rules and here we are. And this is ser I really like and I really think it's good you know. Okay m one two three. I think he got the points now. He's going for the back. Yeah. Points. Three points. He's going for the real naked choke.

2:29:55 (8995s)

Three more points. Yeah. I think he got he got attack. Very good. Jose, congratulations. Congratulations. Amazing performance.

2:30:15 (9015s)

Jose Inas, he just punching punches his way to punches take it to Las Vegas later this year. Here's your champion, ladies and gentlemen. Congratulations. Congratulations, Jose Nasu the Santis. Great job. Once the action started, he was always

2:30:35 (9035s)

looking for the fight and once they got to the ground, he was just he proved to be just from six blades, right? Six blades. Yeah, I saw him fighting. He he very tough, too. We are ready to go. Hey, Marcel, I want to propose you something. Let's get some picks. Okay. Okay. Every fight you pick someone and then I pick someone. All right.
