Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	2:30:55 to 2:40:35 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 2:30:55-2:40:55, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 2:30:55 to 2:40:35.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

2:30:55 (9055s)

And then the next one who got the first pick picks uh after. Okay. So, okay. All right, man. Pick somebody. Okay. I pick. All right. I'm going with Kasio. Six blades now. Okay. Next one you pick. Okay. Next one you pick. And then in the end, who who lose has to pay one asai for the other one. Uhoh.

2:31:15 (9075s)

The bet is is everywhere now. I think I'm buying you asai tonight. I don't know. It's just It's just the first one. Okay. And we have time to to have a draw because it's 99 88 7766. Exactly. Because we didn't do the first one. So maybe we can still we can be even.

2:31:35 (9095s)

Can tie. All right. Let's see what these guys got. They're ready to go. Kasio got his last fight. He got really he left it all on the mat. He got really tired. But against a long time fighter too. I watch him fight. He I I remember him when he was fighting for sister Costa. Then after I

2:31:55 (9115s)

remember him in Atus and then I think now he's back to Brazil. Uh so for sure was a war. I couldn't get to watch this one. I was watching Eli against my teammate Luciano and uh fought really well. So we have one minute 1 minute and a half one minute and a half no points and no

2:32:15 (9135s)

action. You see the refs, they keep they keep giving warning. They keep pushing. That's what I said. I think this is what uh makes a dec so interesting. You know, you know, Marcel is definitely definitely special because they keep pushing, you know, they don't they don't give you time to freeze or to stall or to avoid. You know, if you avoid, they give you warning and they give you penalties.

2:32:35 (9155s)

No one wants that. Let's see how good Casio's guard is. Trying to break Eli's um posture right there. Trying to break his posture right there. Playing like he's in full guard right now.

2:32:55 (9175s)

Hasn't really tried any specific attacks right now. No, I think he's just wasting time. But okay, he he tried to connect the boardlock. Although he's trying to connect the body lock and then try to pass on a DCC, if you stay too much uh on top and no

2:33:15 (9195s)

action, you're going to get warnings, you know? So, even though you try to be like on pressure pass, you need to have pressure active pass, you know. You know what I mean? Marcel, you got to be you got to show action. You got to show that you're trying to pass.

2:33:35 (9215s)

Okay. So we see uh six blaze jiu-jitsu close guard really shihir and sibu is cool too. I don't know how they do now because I they still have hiber and six blades. I don't know what they do now if they split or two different teams but they they all have good juju so and they all have basic jujijs right close guard

2:33:55 (9235s)

is very strong you know so for sure is wasting on some energy too be able to open that guard keeps trying doing it trying to pass the open I think you're going to see some uh penalties last one you See, he just got last warning. Last warning.

2:34:15 (9255s)

More action. Yeah, but he wasn't he wasn't able to open that guard and now Yeah, but on a DC, as we said, you need to keep the pressure active, you know. You don't need you cannot just hold and then stay. If you hold and stay, you you stall, you know, just holding and then

2:34:35 (9275s)

they want to see action. As as you know, why no geese are growing up so fast? because you have much more action than the ghee. You know, the ghee you have more uh small movements on the without the ghee, you're going to see more.

2:34:55 (9295s)

Yeah. And even though you don't know anything, you see some more action. You know, it's like UFC. You don't know anything, but you see blood then you like, you know, it's like the UFC everyone everyone says is like the new Colosh, you know. Yeah. the coliseum. You know, before we see blood, someone killing

2:35:15 (9315s)

each other. Now we just see blood, someone punching and know fighting. That's why they don't do too much jiu-jitsu on UFC, right? On the MMA, because they want to see blood. Uh-huh. Uh-huh. All right. Got a straight arm lock right there. That was a good attempt, but so far unsuccessful.

2:35:35 (9335s)

And he hasn't been able to pass that guard, not even open. Okay. Negative. negative for which I said before. I think he got negative. You got a You got a six blades crew uh coaching coaching their student through.

2:35:55 (9355s)

You got Tyrone. You got Oh, who won actually who won. She has her ticket punched for Vegas this year. We have Professor Diego Pereira as well, the six plates man here in Brazil under Shanji. And Casio keeps going for the straight arm lock. Got one. Eli has minus one.

2:36:15 (9375s)

So if he steals like this, he's losing that is everything is everything we've been talking here. Marel second negative you see because he's just staying there.

2:36:35 (9395s)

Even though Casu is with the with the closed guard, he's trying to do some attacks, you know. He's hugging the arm. Eli is just holding holding and then trying to control her. Things not good for here. And

2:36:55 (9415s)

it looks like Eli is having the hardest time to open that guard. Pasio has a really strong guard and Eli hasn't figured out how to crack the code, man. 1 minute and 40 left.

2:37:15 (9435s)

Things not good for Eli. He might get one more penalty soon. Yeah. And if it stays like this, he's not going to Vegas. Casu is and then you are winning because you picked Casu.

2:37:35 (9455s)

It looks like I might get some free acai tonight, you guys. No, you're just going to open one zero. Huh? We still have three more fights to go. All right. So, now Eli is standing. Let's see if he's able to to open a guard. You see Marcel, he's trying he's trying to connect the body lock, but Kasu is big too, you know, and then Kasu is very big, too. And then has really good

2:37:55 (9475s)

control, as you can see. He control the top of Eli. Kasu is being able to get that under hook on the left side right there. Now he get the leg. You see Eli is so strong. I fought him. So Casu

2:38:15 (9495s)

might be really strong to maintain him on the close guard. And good strategy for Casu also because they say you cannot win. This is playing guard. He's just going against this uh statement. Huh. Seems like Kasu is doing he's really close to get that done. Okay, so Eli is able to open that guard and operate all

2:38:35 (9515s)

the pressure he has. Trying to pass going to try back control now. Try to sink those hooks in. He tried to get him. You need to get to get the is going crazy here in Brazil, guys. All right, he gets up. Okay, two points. Las Vegas.

2:38:55 (9535s)

Eli was able to get that guard open, but it seems like it was a little too late. Too little too late. Did a great job though. Congrats to these guys. Congrats to Casio. We go to Gabriel now. But sometimes you know that you can lose and then stay happy. So if I lose and Char is good. Even though I really

2:39:15 (9555s)

like Gabriel too. He's nice guy. I like to talk to him. All these guys. Yeah. These both really nice. Like all of these guys. Okay, I think this is going to be the best fight of the finals because 88 was the most stacked division.

2:39:35 (9575s)

It was really stacked and we had like 20 really good players. I feel like we might we might see some we might see some action here even even like some takedown attempts and everything even before the points are count. I really think so. Meaning business man. They both has they are wellrounded players you know. You see Gabriel, he can do guard. He can do leg attacks.

2:39:55 (9595s)

Chari is way better on top and then take him down, but he can also play guard. He does half guard, you know, like uh Kawachi and then Gabriel made us, which is really good for guard. Yeah, very good for Noi.

2:40:15 (9615s)

Now they go all the way across the the next mat. Our ref brings them back brings them back over. Let's restart the action. Okay. Gabriel made I think he charged the motor something hit his eye. You see that his eyes Uhuh. small price to pay. Yeah. To punch his ticket.

2:40:35 (9635s)

It worth it. You know the best thing is win and then be broken. You know, then you say, "Okay, I gave everything and then I won." Then it's the best thing. Oh my god. Definitely. And one of one of the things that is very unique about about ADCC is that the refs will tell you. The judges will tell
