

Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)

Video	https://www.youtube.com/watch?v=pwGbW5GZgfc
Title	Watch Every ADCC Trials Finals From 2023-24 (Over 8 Hours Of Action!)
Channel	FloGrappling
Uploaded	20240707
Video length	8:29:33
Frames sampled	30, one every 20s
Covers	2:40:55 to 2:50:35 of the video
Footage type	full event
Source note	ADCC Trials Finals 2023-24 compilation, unindexed remainder 2:40:55-2:50:55, coarse locator window

How to read this

Every frame carries a VIDEO-ABSOLUTE time -- seconds from the start of the video at the URL above, NOT seconds from the start of the bout -- printed as text directly above it. Those times run from 2:40:55 to 2:50:35.

Return every timestamp in that same video-absolute clock. If the bout starts partway into the video, say where it starts as a separate field -- do not rebase the event times to it. A bout-relative time reported as an absolute one places the whole fight in a different part of the broadcast, and the result looks plausible while being wrong.

THE CAPTION TEXT BESIDE EACH FRAME IS A GUIDE, NOT GROUND TRUTH. It is an auto-caption of live commentary: the commentator misnames athletes, talks about one bout while another is on screen, anticipates and speculates, and the text lags the picture. When the caption and the frame disagree, THE FRAME WINS. Use the caption to orient where to look and to break a tie on a label -- never to record an event you did not see in the frame itself.

For each event you can see, give:

<code>ts</code>	integer seconds, video-absolute
<code>label</code>	a technique name, taken verbatim from the label list
<code>actor</code>	which competitor did it, by name
<code>successful</code>	true if it landed, false if attempted and stopped
<code>type</code>	one of: control, submission, guard, takedown, pass, transition, sweep, escape
<code>points</code>	points the scoreboard awarded for THIS action; omit if you cannot read it

Points are the one thing the scoreboard is authoritative for, and reading footage is the first time they are visible at all -- a transcript only ever carried what a commentator said aloud. So: report `points` only when you can actually read the number change on the scoreboard between frames, attribute it to the action that caused it, and OMIT the field otherwise. Never write 0 to mean 'I could not tell' -- an action that scored nothing and an action nobody could score are different facts, and only an absent field holds the second. If the score jumps and you cannot see which action earned it, say so in `note` on the nearest event rather than guessing an attribution.

Also return, once per bout: the two competitors' names, the event/card name, the year, who won and how, `bout_start_seconds` -- the video-absolute second the bout begins -- and `final_score` as "a-b" if the scoreboard shows one. If this video contains more than one bout, return one such object per bout.

LABELS ARE A CLOSED VOCABULARY. Take each `label` verbatim from `node_library.json`, which lists every technique the library knows, most-used first. A label is normalised into a node key, and that key IS the node in every graph it reaches -- so a spelling the library does not have does not fail, it mints a second node, and one technique arrives split in two with no error anywhere. Where two listed names could both fit, take the one printed higher: that ordering is how often the corpus already uses it. If a frame genuinely shows something the list does not cover, use your own words and flag it as `new_label: true` rather than bending it into the nearest listed name.

NOT EVERY FRAME IS LIVE ACTION. A broadcast cuts to slow-motion replays, usually right after a finish or a scoring exchange, and a replay looks exactly like the thing it replays. Read one as new action and the same event is recorded twice, seconds apart, which downstream reads as a repeated technique rather than one shown twice. Tells: a graphics bug or logo appears, the clock stops or disappears, the camera angle changes, the action repeats something you already saw. Skip those frames rather than logging them, and say in the note which range you treated as replay.

AND NOT EVERY FRAME IS THIS BOUT. A broadcast cuts away -- to another mat, to a different match's scorecard, to a crowd shot or an ad -- and it may show two bouts in sequence with a gap between rounds. A reader found exactly that in this batch: a scorecard from an unrelated match sitting in the middle of the sampled frames. Events read off a cutaway land on the wrong athletes entirely, which is worse than missing them. Before logging any event, confirm the frame shows the two competitors you identified, and say in the note which ranges you excluded as not-this-bout.

THE SCOREBOARD'S NAME ORDER IS NOT A MAT POSITION. A lower-third graphic puts one name left and one right by broadcast convention; which competitor stands where on the mat is unrelated and changes shot to shot. Binding a name to a body through that order is the single highest-cost error available here, because `actor` is on every event -- get it backwards and the whole answer inverts at once, while still looking internally consistent. Bind identity to something carried ON the athlete instead: a name printed on the back of the rashguard, kit colour, sleeve length, an ankle band, hair. Then check that discriminator against a frame where the scoreboard and the bodies are visible together, and say in `identity\_verified\_by` which frame did it.

REPORT ONLY WHAT YOU ARE CONFIDENT OF -- but report uncertainty by getting COARSER, not by staying silent and not by guessing. If the frames show that something happened and you cannot tell exactly which technique it was, use the generic label the library already carries -- `Guard Pass` rather than a named pass, `Takedown` rather than a named entry, `Submission` rather than a named finish, and likewise `Sweep`, `Escape`, `Guard`. A generic label is the honest answer at the resolution these frames give you; a specific one you inferred is a claim about a technique nobody saw, and once it is in the athlete's graph nothing downstream can tell it from an observed one.

This matters most across the sampling gap. At one frame every 20s a technique can start and finish between two samples, leaving only its result visible -- a competitor who was on top now now underneath, a grip that is now a finish. Recording that result generically is correct. Naming the entry you did not see is not, however obvious it feels. The same rule covers `actor`: if you cannot tell which competitor did it, say so in `note` rather than picking one, because a right technique on the wrong athlete is two errors.

The result line at the top, when there is one, comes from the athlete's BJJ Heroes record. It is there so you can tell the two competitors apart and know the bout ended -- it is NOT evidence of anything you cannot see. Do not report a finish, a technique or a score because that line names it: an armbar listed as the method and an armbar visible in the frames are two different claims, and only the second belongs in your answer.

Only report what a frame actually shows. The scoreboard settles POINTS and nothing else: a technique you infer from a score change but never see is worth less than an omission, because a wrong label propagates into the athlete's graph and their rating and nothing downstream can tell it from an observed one. An omission is recoverable; an invented event is not.

2:40:55 (9655s)

you this is not the time to be nice. And this is not the time where someone will protect you. If you got caught if you got caught in a submission and you feel like it's going to break. You have to tap cuz the refs ain't protecting you. They're going to let it break. If you let it break, they're going to let it break. Yeah. Hey, best start. Best start. Look, we see both going for the kill. you know, even in the beginning, we still

2:41:15 (9675s)

have two minutes remaining for points and Gabrielle. Yeah, as as I said, I think it's going to be the best final. Yeah, I can only when the points start counting. One one low kick trying to to single leg, but low kick was okay for the refs.

2:41:35 (9695s)

Little little multi-action happening there. I think Gabrielle is doing a little bit better. You see they just warned Charles. He got double unders. Okay. Double under for him. Charles just got double unders. Oh, nice. Nice.

2:41:55 (9715s)

That was all his coach. His coach called it. He listened and now he's on top. Chai is calling Gabriel. Hey, don't lose the position because it's really hard to get on this position on Charles. Shar with Hera. So they do a lot of specific training for sure. He has really good defense.

2:42:15 (9735s)

Okay. Take down attempt again. Yeah. Ref's going to reset them in the middle of the mat. So as we said before on DC they count a lot the attacks and Gabriel char start the attack almost went for the single leg and then Gabriel counterattacked the single leg and then went on top went for the guillotine. So I think Gabriel

2:42:35 (9755s)

has maybe 21 on attack being being a commentary and a judge. Oh my god, I'm trying too much tonight. That's everyday everything. Look at this guy. I just received a message from my professor and good friend Bah. And then he's like, bro, I just hear you now commentating. You are the everyday pad.

2:42:55 (9775s)

This is idol. Okay. Homo watching us at slow grappler. Yeah, Omar Bahares is alive. ADCC 2013 winner

2:43:15 (9795s)

20 minutes points. Okay. And then one attack for Charles and they enjoy. Huh. Bro, one really nice thing is when you fight someone and then he's trying to kill you, you try to kill him and then you keep fair. You know that that motivate you to like not end the fight. No, like, okay, let's fight for 30 minutes.

2:43:35 (9815s)

All right, points start now. Let's see if they're going to go for that takedown. They've already gone for takedowns before. Let's see what they're going to do now. Now they're going to give they're going to go for the two times Q, you know, because they already going for the queue. No points. Double the effort. Double the for the effort for sure. All right. Now, uh, I want to remind you guys that should the match go to an overtime, the judges will always judge

2:43:55 (9835s)

the aggression, judge who initiated more during the fight, but during the entire fight, not only the overtime, the fight is always judged in its entirety, not only the overtime. Let's see what this guy's got.

2:44:15 (9855s)

You see that Charlie is trying heavy hands. Gabriel is more like uh movement more. Okay, they were trying to get for the single leg and they've been fighting for over four minutes. They've been fighting hard and they're both they look pretty fresh. They don't look gassed out. Yeah, they they all wellrounded guys and well trained for sure.

2:44:35 (9875s)

Congrats to both to these both ready for this. They both mean business. Now, is the victory even better when they give you a really good fight? Yes, for sure. Get it done in one minute and go home. No, I like awards. No, even like the wars. I like the war, you know, and I think the the public they like the war, too, you know, even though I I lost a

2:44:55 (9895s)

lot of fights, I always give everything, you know, and then I have like a good mind, you know. Okay, I gave everything before and then in the tournament. I really earn it. Gives you the sense that you really really earned it. And one thing that is interesting about these two guys, they stare into each other's eyes whenever they're facing each other. They're not looking at shoulders. They're not looking at hips.

2:45:15 (9915s)

They were staring at each other just a minute ago. Just a moment ago, I should say. They were staring staring at each other's eyes. So, uh, Gabriel just tried a fireman carry throw right there. Wasn't able to get it done, but was able to stand up again real quick. You see the difference between like the 88 and then the plus 99 because 88 you are really strong and then you still

2:45:35 (9935s)

have a lot of mobility. So, can you count how many attacks Gabriel try and then how many attacks Charles tries? Nice single leg attack for Charles trying for the guillotine. As we said, Charles started the attack almost take down. Now he's trying to go for the back. Okay, good attack.

2:45:55 (9955s)

Sh had a good defense for sure. Let's see. We see Gabriel trying for the half. Nelson one hooking. Sh the back trying to get on top.

2:46:15 (9975s)

Okay, then Charles can play guard because he was defending the back and then he end up on bottom. You know the difference Marcelo between pulling guard and end up on bottom. He didn't pull guard. Correct. Because the minus one you get is by pulling guard. He didn't pull guard. He just defend the back and then end up on bottom there which might work out for him. Maybe that's what he wanted to do all along. We'll see.

2:46:35 (9995s)

He has one minute and a half to work. Lots going on right there. Really see how tight it was. All right, drop just initiated. We will The crowd wants more action. They don't think it's enough.

2:46:55 (10015s)

We might have a leg attempt at going for the back. Hey, what a fight. What a fight. What a fight. And that's the thing, and we even saw uh this a lot here today. Whenever you want to attack legs, you end up exposing your back. And we saw a few back takes here today when they were attacking the legs, going for the legs and and then they would expose their back and people capitalized on it today.

2:47:15 (10035s)

The best fight I saw today by far. They did everything. They did take downs. They did really nice guard. They did take down defense. Really trying to pass that. They try leg log attacks. As you said, they're very wellrounded players.

2:47:35 (10055s)

Yeah. And then we have a good thing to celebrate. Four more minutes because it's going to overtime. 20 seconds to go overtime. Marcelo, we'll see what the judges have for us right now. We got Gabriel Almeida trying to play trying to pass that guard while Charles Negroont defends it with

2:47:55 (10075s)

everything he's got. Hasn't been able to to shoot any attacks of his own though. Let's see what the judges have for us. Going for overtime, you guys. We have overtime here. Let's go. Ready.

2:48:15 (10095s)

So, the judges standing them up. Asked them if they were all ready. It seems like the table asked them to hold for a second. We have Professor Cristiano Chicharini, ADCC veteran. He fought in China, ADCC

2:48:35 (10115s)

trials winner. going for Charlie Negro and then Chiago Sa going for Gabriel. So two warnings for Charlie and Gabriel. Yeah. And Thiago Sahu got surprised today by by a fucking Roshia student that uh got him with a buggy truck.

2:48:55 (10135s)

Yeah. Got him with a could not he felt he felt like he was safe. He could not believe how tight that was. He ended up having to take Oh, Shan's going for the back. Let's see how it goes. Gabriel has a good defense. Now it's time to Gabriel show his defense because Sh already show his defense. Okay, hook him in. Good seat

2:49:15 (10155s)

belt control. What the hook? One, two, three. Very nice. Got body triangle locked. He's going for the choke now. Zero in the finals. 2 minutes and 45 minutes. Yeah, he's got time to work on this. He got time and Gab has time to recover. Let's see.

2:49:35 (10175s)

One kind of person that if he scores ahead of you, good luck. Good luck to get it back, right? And he keeps attacking the neck as well. Coach keep asking him to sub. Let's go for the sub. Let's go for the sub. Let's catch him.

2:49:55 (10195s)

action-packed action-packed final right there. Best fight of the night for sure. If it end if it ends with a submission, then it's for sure the best fight of the night.

2:50:15 (10215s)

Best fight, right? We saw everything including a sub, but it might not be too far from that. Again, this is the under 88 final of the ADCC South American trials in Brazil. You got Charles Neggerante and Gabriel Almeida. But Gabriel is a warrior so he will not give up. You know, he'll try to escape and then score. He is a warrior. He is willing to die.

2:50:35 (10235s)

You see, he's trying to get the hook to to break to break the body triangle. There he is. And and there's an attack right there. If you trap trap his leg right there, it can hurt a little bit, but I think he's trying to to break the the the that lock. The lock. Yeah. He tried to go for one side then he couldn't. But I think the best option is to come to this side here. The the the side you have the
